Danube Transnational Programme
Danube SKILLS

Danube SKILLS

Project co-funded by the European Union

Public consultations

on current legislative framework, procedures
and practices governing qualifications in inland
navigation in the project countries

 **Interreg** 
Danube Transnational Programme

WP 3, Act 3.1

Priority Area:
4 – Well governed Danube Region

Act 3.1 Investigation and analysis of state of play in Danube Education and Training sector

Danube SKILLS results
addressing IWT stakeholders

Total Budget: 2 023 100 EURO

ERDF: 1 586 185 EURO

IPA: 133 450 EURO

ENI: 0 EURO

ACTIVITIES

- 1 Preparation of a report on contents of the proposal for a new Directive, the requirements to be met by competent authorities in the Member States concerning organisation & supervision of examinations, approval of training programmes as well as information on the draft standards of competences, medical fitness, practical examinations and approval of simulators.
- 2 Public consultations by means of national workshops organised in all consortium countries raising awareness on and seeking support of Danube region public authorities and education and training institutions for the approval and subsequent implementation of the new common standards and collecting feedback on existing legislative framework governing qualifications in inland navigation in subject countries, plus UA and MD, by filling out of dedicated questionnaires.
- 3 Preparation of a preliminary report on current legislative framework, procedures and practices governing qualifications in inland navigation in the consortium countries, highlighting need for legislative, organizational and institutional changes based on feedback received during the public consultations, to be further used for development of transnational model courses and as starting point for the gap analysis in WP5.

DELIVERABLES

- 1 Report on the provisions of the new Directive and the responsibilities of the competent authorities to be designated by the Member States for its implementation with respect to the issuing, renewing and withdrawal of certificates of qualification.
- 2 Preliminary report on current legislative framework, procedures and practices governing qualifications in inland navigation in the project countries, based on feedback received during public consultations.

OUTPUT

- 1 Public consultations in 8 countries will disseminate the proposal for the new EU Directive & collect information on existing legislative framework governing Danube nautical education.
