

Global Water Partnership Central and Eastern Europe

Global Water Partnership Central and Eastern Europe (GWP CEE), established in 1998, is an international network of organizations involved in water resources management: governments institutions, professional associations, research institutions, nongovernmental organizations and private sector. Its vision is for a water secure world and its mission is to advance governance and management of water resources for sustainable and equitable development. GWP CEE's international network comprises 12 Country Water Partnerships (CWPs) in Bulgaria, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Moldova, Poland, Romania, Slovakia, Slovenia and Ukraine with more than 170 partner organizations from different sectors. GWP CEE excels at integrated drought and flood management, integrated water resources management, stakeholder participation, knowledge management and communications. It has proven track record in stakeholder involvement, providing neutral platform for dialogue and cooperation towards sustainable management of water resources. On national level, CWPs support the development of national policies by convening multi-stakeholder dialogues on integrated water resources management, climate change and other cross cutting topics.
