

# Upravljanje z migracijami v Podonavju

Foto: MRA

Projekt **YOUMIG**, ki se je začel leta 2017, pa daje poudarek zlasti migraciji mladih (starih med 15 in 34 let), saj predstavlja izziv na vseh upravnih ravneh. Spletni komunikacijski kanali in novi vzorci obnašanja predstavljajo nove gonilnike migracij, hkrati pa kažejo resne posledice na razvoj posameznih območij znotraj Podonavja. Odseljevanje mladih praviloma pomeni izgubo delovne sile in človeškega kapitala, pogosto pa vpliva na denarne tokove v matične države, kot so socialni transferji ter denarna nakazila. Po drugi strani pa priseljevanje, v kolikor se s procesom ne upravlja pravilno, lahko privede do marginalizacije in neučinkovite uporabe človeških virov. Večina razlogov za migracije mladih, kakor

Resolucija o migracijski politiki Republike Slovenije (ZRC SAZU) – Inštitut za slovensko

## Managing migration in the Danube region

Translated summary of the article published in Slogopis<sup>1</sup> (30.9.2017)

mag. Borut Jurišič

The Resolution on the Migration Policy of the Republic of Slovenia recognises the principle of a freedom of movement and stresses that “new dynamics of migration flows influence the ways of managing migration”. There are two projects, both lead by the Hungarian Central Statistical Office, contributing to this issue: **SEEMIG (2012-2014)** and the ongoing **YOUMIG** project (both co-funded by EU).

Searching for answers to the challenges youth migration presents to local communities has led to a connection between statistical offices and the academic sphere that will set the framework for coordinated activities of local authorities in integrating the development potential of youth migrants and contributing to the better management of migration within the Danube region. Through **YOUMIG** the statistical offices, academia, and local authorities will gain competences for the preparation of local development strategies and transnationally-tested tools for the management of local challenges in youth migration.

V letu 2014 zaključen projekt **SEEMIG**, v katerega sta bila s slovenske strani vključena tudi Znanstvenoraziskovalni center Slovenske akademije znanosti in ume-

sošestvo sosednje države.
