

**Invitation**  
***InnoHPC training: Capacity building for HPC providers and SMEs***  
**20-21<sup>th</sup> September 2018**

Dear Partners,

Hereby I invite you to the 3th InnoHPC training: Capacity building for HPC providers and SMEs scheduled between **20<sup>th</sup> and 21<sup>th</sup> September 2018** in **Timisoara, Romania, at West University of Timisoara**, organized in the framework of ***SYNASC 2018 - 20th International Symposium on Symbolic and Numeric Algorithms for Scientific Computing***.

The main objective of InnoHPC is to create transnational HPC laboratory for co-designing knowledge-intensive innovative products with high value-added in transnational value-chains. Key outputs are transnational InnoHPC Lab pooling regional HPC infrastructure and competencies, web platform providing HPC access, integrated services and capacity building tools, and sustainability toolkit, to support durability of InnoHPC Lab beyond the project.

This InnoHPC activity will develop a part of relevant tools of InnoHPC Lab. In the first part, HPC capacity building tools and programs for HPC providers will focus on using HPC technology to solve problems of SMEs active in electronic and automotive industries, particularly in development and testing new products or production methods in the framework of transnational industrial value-chains, translating business problems to scientific language and to develop entrepreneurial spirit of researchers.

In the second part, HPC capacity building tools and programs for SMEs from electronic and automotive industry will develop skills of entrepreneurs from SMEs to communicate their problems to researchers in academia, build their understanding of HPC and its possible applications, build intercultural competencies required to co-operate in the framework of transnational value chains and also train their researchers to use HPC skills.

We hope you can make time in your busy schedule to attend the training and share your ideas on HPC topic on the panel! Please, make your registration for participation on the following link, no later than **September 17th 2018**:
