Information services - INDanube website

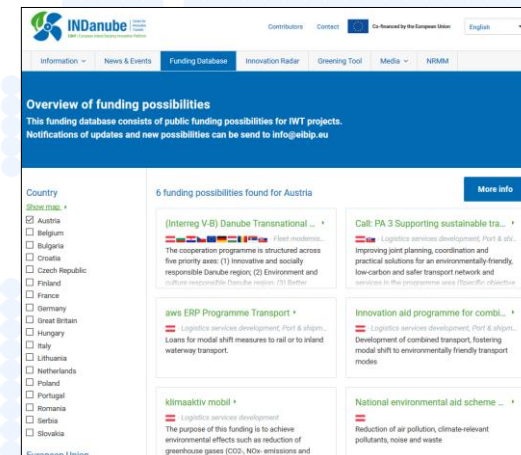

INNOVATION RADAR

The Innovation Radar is a powerful tool mapping future-oriented, emerging and innovative technologies along with technical papers, publications and projects relevant for the inland waterway transport sector.

GREENING TOOL

The Greening Tool is an interactive tool designed for ship owners and policy makers looking for emission and fuel consumption reduction of inland waterway vessels. It contains the most recent information about costs and benefits of available greening technologies for inland shipping.

FUNDING DATABASE

European Funding Database, maintained by EIBIP, is an online tool consolidating public funding opportunities relevant for inland waterway transport (IWT) sector. Through this tool the IWT users can search for various funding opportunities and calls either by country or by pre-defined policy areas.
