INFO BROCHURE

Building a Green Energy and Logistics Belt

ENERGY BARGE bioenergy online tools accessible via the
Modal Shift Platform for Green Bioenergy Logistics

www.energy-barge.eu

Join us

... and benefit from the bioenergy and modal shift platform - a place where info on the Danube region's biomass and bioenergy business and the Danube logistics meet!

www.energy-barge.eu

The ENERGY BARGE platform and your benefits at a glance

Bionenergy markets

Explore the national and transnational biomass and bioenergy markets in the Danube region.

Green Danube Logistics

Learn what Danube logistics can do to facilitate biomass transport and how Danube ports can become biomass and bioenergy hubs. Get practical guidance on the transport, handling and storage of biomass along the Danube.

Value chains

Get an overview over current biomass import and export flows relevant for the bioenergy sector and explore examples for improved and sustainable utilization of biomass for bioenergy purposes.

Find your partner

Use the ENERGY BARGE platform to find new partners along bioenergy value and supply chains and discover possibilities for new logistics solutions.

Which tools are available?

On the Modal Shift Platform, three tools are integrated via a joint dynamic map view. The tools are:

Biomass & Bioenergy Atlas

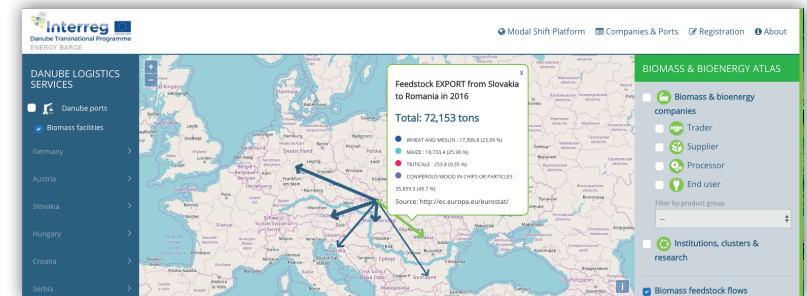

Get an overview on the company landscape, business contacts, land cover and feedstock flows in the Danube region

Danube Logistics Tool

Find practical guidance and partners for green bioenergy logistics along the Danube

Good Practice Tool

Learn from working examples utilizing biomass as well as the benefits from inland waterway transport and port location and compare with your case

What are the functionalities?

- Cross-sectoral and dynamic visualization of market actors from bioenergy and Danube logistics for business development
- Handbook with practical information for transporting biomass on the Danube
- Option for company registration
- Option to view trade flows
- Good practice examples of integrated bioenergy and Danube logistics
- Option to explore background information and project reports
