

High performance computers
(super computers)
in the function of business improvement
Promotional workshop of HPC projects

Regional Agency for Economic Development of Sumadija and Pomoravlje and Faculty of Natural Sciences and Mathematics Novi Sad (in front of the project High Performance Computing for Innovative Innovation - InnoHPC), in cooperation with the Faculty of Electronic Engineering in Nis, organize a promotional workshop on the role, significance and capabilities of HPC (High Performance Computing) resources in Serbia.

The purpose of this joint workshop is to raise the level of awareness of small and medium enterprises, as well as the professional public about the existence and capabilities of the centers with high performance computers (super computers) for the needs of business development in Serbia.

The event is intended primarily for SMEs operating within the electro sector, as well as all others in the territory of the branicevo District, as well as for representatives of the public sector and support organizations.

Target groups:

1. Public sector representatives, decision-makers
2. Business support organizations
3. Small and medium enterprises
4. Business clusters
5. Partners of the project

The workshop will be held on March 11, 2019. at the RC3 Computing Center, Department of Mathematics and Informatics, Faculty of Science in Novi Sad.
