# NARW: role in the project

NARW is responsible for WPT4: “Capacity building”

- training courses
- training material packages
- synthesis reports from all training courses
- technical guidance manual
- final international workshop

lessons learned  
recommendations

## WPT4: “Capacity building”

### Why do we need this WP?

- improve the **capacity of measuring and inventorying HS pollution** → 8 national and 1 regional training courses held in 9 official languages of the DRB;
- extend the **capacity for model application and scenario assessment** → 3 transnational training courses held in English;
- enhance the **capacity of quantifying, managing and mitigating HS pollution** → technical guidance manual on HS pollution management to be presented at the **final international workshop**.

## WPT4: “Capacity building”

### What do we do in WPT4 “Capacity building”?

1. Enhancement of the capacity in the Danube Basin for scoping, inventorying and monitoring of HS pollution

2. Enhancement of the capacity for HS emission modelling and scenario evaluation

3. Preparation of a concise technical guidance manual on hazardous substances pollution management

4. International workshop on management of HS pollution

## WPT4: “Capacity building”

### How we will involve the stakeholders in the project?

Stakeholders will be invited to:

- national/regional trainings for monitoring and inventorying of HS pollution;
- transnational trainings on modelling and scenario evaluation;

*hands-on courses for small groups of participants*

- International workshop on HS pollution management
  - group discussions
-  Technical Guidance Manual
  - exchange of experience

## WPT4: “Capacity building”

### Target Group we addressed:

- decision makers, planners, technical experts from authorities and sectoral agencies
- interest groups as well as environmental NGOs
- higher education and research institutions
- ICPDR and its technical experts and other international organisations

### Where do we want to stand at the end of this project ?

#### Outputs/Results:

- T.4.1 National/regional trainings on monitoring and inventorying of HS pollution
- T.4.2 Training material packages on monitoring and inventorying of HS pollution, in English and in national PP languages of the DRB
- T.4.3 Transnational trainings on modelling and scenario evaluation
- T.4.4 Training material packages on modelling and scenario evaluation, in English
- T.4.5 Technical guidance manual on HS management for stakeholders
- T.4.6 International workshop on management of HS pollution
