Pilot Area actions (WP T2)

CONTENT OF THE PRESENTATION

- Introduction to pilot area work
- Local cross-sectoral operational plans
- Stakeholders' involvement
- Transnational workshops
- Next steps & open discussion
- Q&A, Wrap up

Introduction to Pilot Area work

SaveGREEN aims to demonstrate ways of designing appropriate mitigation measures and maintaining or improving the functionality of ecological corridors through integrated planning.

What?

The main objective of WP T2:

- to secure ecological connectivity
- through developing and implementing concrete mitigation measures
- by addressing a multitude of sectors: transport, agriculture, forestry, water management, hunting, spatial planning etc.

Introduction to Pilot Area work

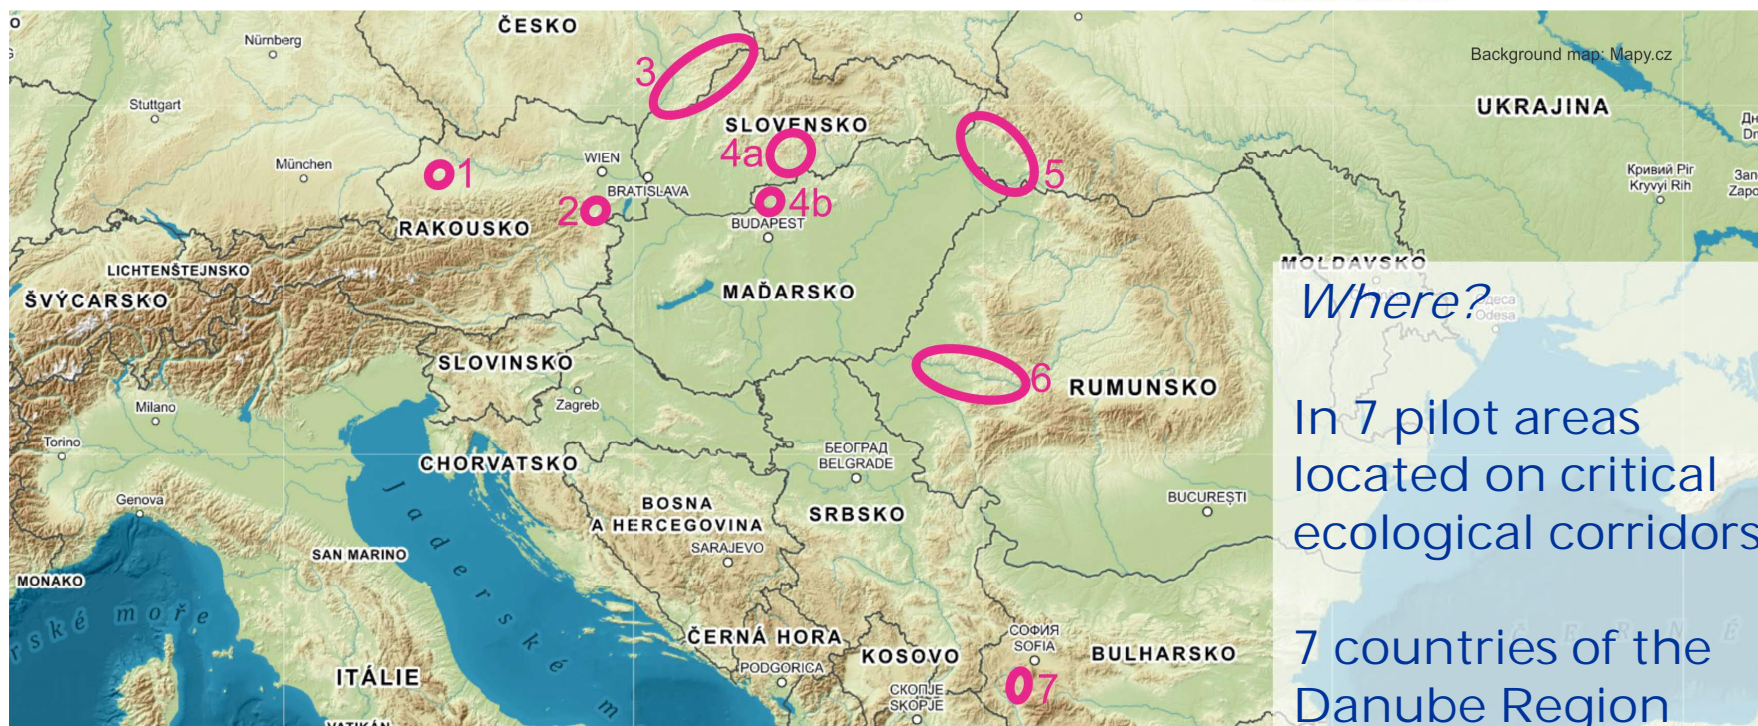

How?

Participatory development of 7 Cross-Sectoral Operational Plans (CSOPs) for ecological corridors' functionality

&

Partial implementation of the CSOPs during the project duration
in Pilot Areas.

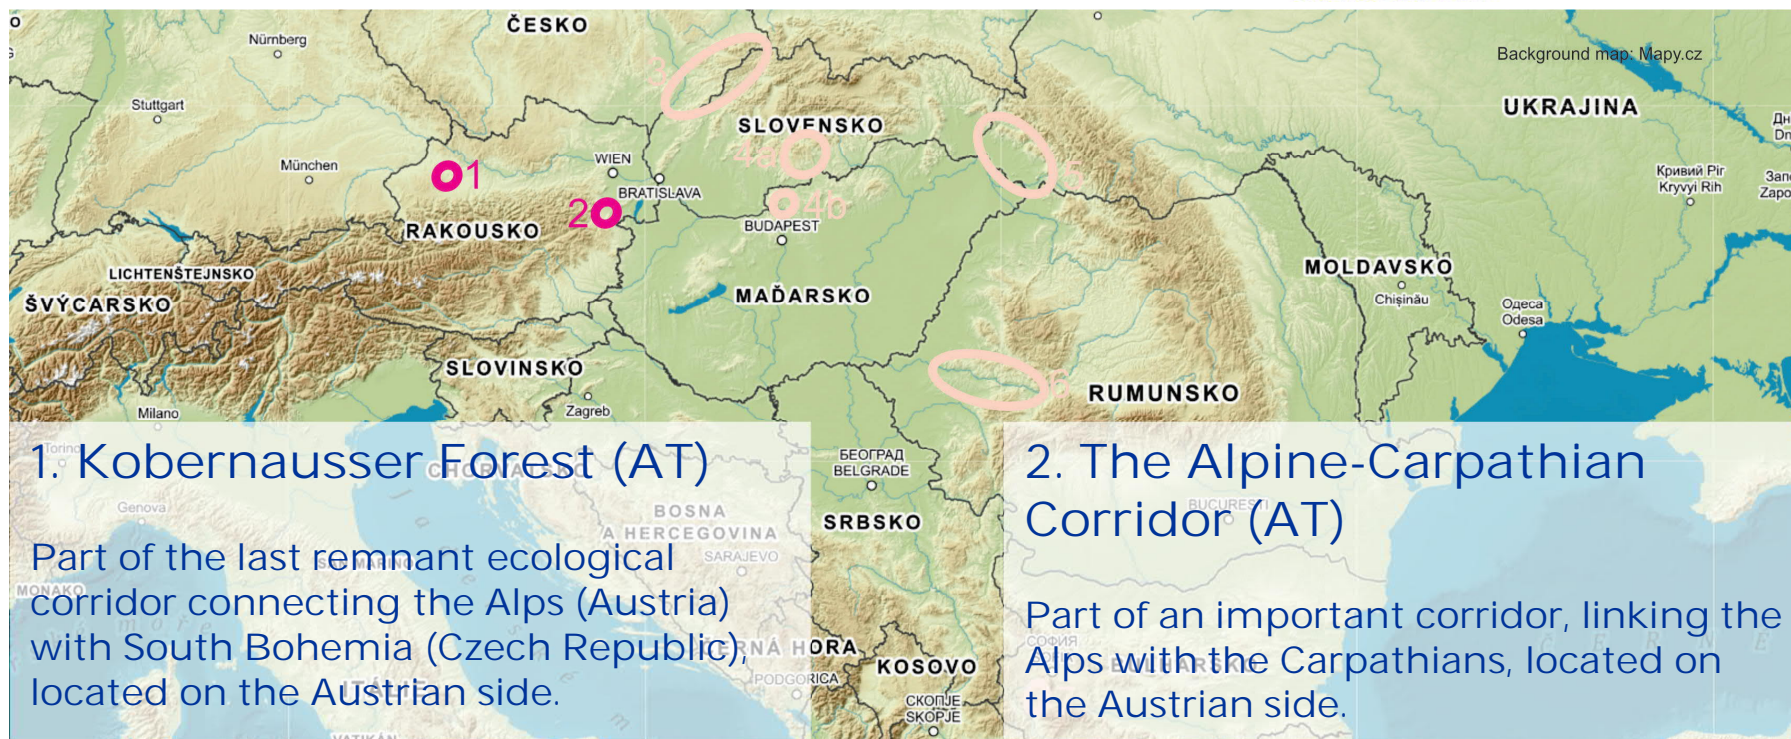

Introduction to Pilot Area work

5. Zakarpatska region (UA)

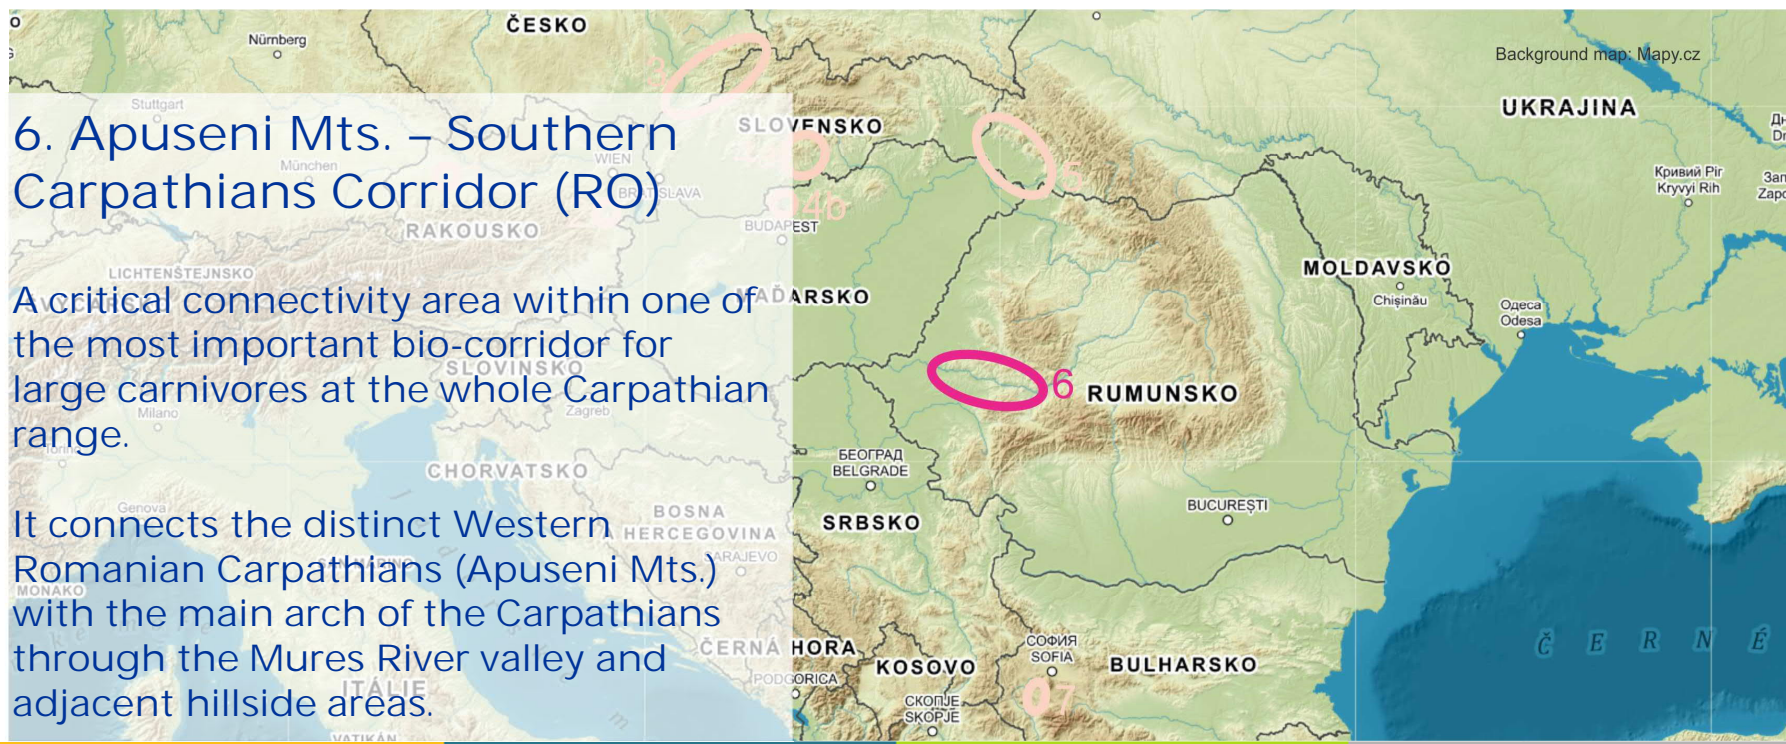

A critical transboundary connectivity area at whole Carpathian range, it is one of the most important bio-corridor for large carnivores migration between Poland, Slovakia and Romania, Hungary, through Ukraine.

Located on the southwestern slopes of the Ukrainian Carpathians and it is adjacent to Transcarpathian lowland, included in the Tisza River catchment.

Introduction to Pilot Area work

WP T2 - Outputs & Activities

Outputs

T2.1	Transnational technical experience exchange workshops
T2.2	Local Cross-Sectoral Operational Plans Including concrete measures to safeguard, enhance, restore functionality of ecological connectivity in the pilot areas
T2.3	Preparatory actions for implementing Local Cross-Sectoral Operational Plans

Introduction to Pilot Area work

WP T2 - Outputs & Activities

Activities & deliverables

Activity	Deliverable
1. Engage and cooperate with relevant stakeholders for the specific pilot area	2.1. Stakeholder analysis of each pilot area
	1.2. Meetings with local working groups and other relevant stakeholders

Introduction to Pilot Area work

Activities & deliverables

Activity	Deliverable
2. Develop cross-sectoral operational plans to safeguard functionality of ecological corridors in the pilot areas	2.1. Multi-sectoral online datasets for the pilot areas
	2.2. On-line library of multi-sectoral solutions for ensuring functionality of ecological corridors
	2.3. Local monitoring plans as an integral part of the local cross-sectoral operational plans
	2.4. Draft local cross-sectoral operational plans

Introduction to Pilot Area work

Activities & deliverables

Activity	Deliverable
3. Implement selected actions of the local cross-sectoral operational plans	3.1. Report on testing the application toolbox and the standardised monitoring methodology
	3.2. Monitoring reports and GIS database

Introduction to Pilot Area work

WP T2 – Actions and complementarities with other WPs

- identify specific issues related with bio-corridor management;
- effectively engage with stakeholders & set-up local working groups;
- develop local database: multi-sectoral on-line data sets & on-line library of multi-sectoral solutions.

WP T1

Introduction to Pilot Area work

WP T2 – Actions and complementarities with other WPs

- identify, test and use the monitoring tools; WP T1
- develop local monitoring plans and implement monitoring activities; WP T1
- identify the needs for, and facilitate the local capacity-building programme; WP T1
- organize transnational workshops - know-how exchange activities / learning by doing. WP T1

Introduction to Pilot Area work

WP T2 – Actions and complementarities with other WPs

- participatory development the Cross-Sectoral Operational Plans) for bio-corridor functionality;
- demonstrate / test/ implement concrete measures of bio-corridor management during the project duration; WP T1
- support with concrete examples the development of the Handbook on best practices; WP T1
- Relevant gaps, to inform the policy activities. WP T3

Introduction to Pilot Area work

WP T2 – Actions and complementarities with other WPs

- develop local communication plans and implement communication activities.

WP C

Local Cross-Sect. Op. Plans

2. Local cross-sectoral operational plans (CSOPs)

Why?

The main problem:
Lack of integrated management

The Local CSOPs will be the main concrete immediate response to threats to connectivity and the basis for implementation of practical measures.

Local Cross-Sect. Op. Plans

What?

A common logical framework facilitates the logical path from pressures / threats > actions.

Based on data & exchange of know-how

Cross-sectoral GIS database compiled for each PA (Deliverable).

Library of resources (Deliverable): good (and bad) practices.

Local Cross-Sect. Op. Plans

How it will be developed?

Participatory manner - stakeholders from all relevant sectors, by local working groups (stakeholders, experts and PPs).

The final versions of the CSOPs will be developed with contributions derived from the transnational workshops.

Local Cross-Sect. Op. Plans

Sustainability?

Stakeholders' Ownership

Integration in sectoral plans

Log-frame for sectoral projects & collaborations

The process is important!

Examples of successes / gaps > targets for the policy activities

Networking

Local capacity building

It is long-term endeavor...

Local Cross-Sect. Op. Plans

Structure

Logical Frame > Main goal

Safeguard, enhance or restore functionality of ecological connectivity in the PA

What we want to address? = Pressures & threats

What we want to achieve? = Specific objectives to address P&T

Who is impacted / interested? = Sectors & Stakeholders

Who is responsible / could contribute? = Main actors

Local Cross-Sect. Op. Plans

What we should do? = Actions (& maintenance)

How we will do it? = Tools, methodologies, standard procedures, ...

Where we will do it? = Locations

When we do it? = Calendar

How we measure success? = Indicators & how we monitor them

What is needed? = Resources (needed vs existing)

How important it is? = Relative priorities

Anything else? = Comments / feedback

Local Cross-Sect. Op. Plans

A Proposed Structure > TBD!

1. Pressures & threats
2. Specific objectives to address P&T
3. Sectors & Stakeholders
4. Main actors
5. Actions (& maintenance)
6. Tools, methodologies, ...
7. Locations
8. Calendar
9. Indicators & monitoring
10. Resources
11. Relative priorities
12. Comments / feedback

Local Cross-Sect. Op. Plans

Examples of ...

1. Pressures & threats
2. Specific objectives
3. Sectors & Stakeholders

... Arad-Deva (RO)

SEPARATE TABLE

Stakeholders' involvement

3. Stakeholders' involvement

The whole SaveGREEN project concept is built around the participatory engagement of target groups and representatives of relevant stakeholders throughout the project!

Who are they?

What are their interests & needs re. project?

How to engage efficiently?

How to communicate / manage conflicts?

How to built trust?

Stakeholders' involvement

Stakeholder analysis (deliverable / October 2020!)

- Synthetic & live annex to local CSOPs = Stakeholder Register
- Common structure
- Based on TRANSGREEN, ConnectGREEN, HARMON,... experience

Examples & References

- Protected area management
- Transport!

Stakeholders' involvement

A Global Strategy for Ecologically Sustainable Transport and other Linear Infrastructure

Georgiadis L (Coord), 2020. A Global Strategy for Ecologically Sustainable Transport and other Linear Infrastructure. IENE, ICOET, ANET, ACLIE, WWF, IUCN, Paris, France

Aim and objectives of the Global Strategy

...

(4) Promoting multi-sector cooperation

Stakeholders' involvement

The process:

Stage 1: Scoping and mapping of stakeholders

Stage 2: Assessing, analyzing and prioritizing stakeholders

Stage 3. Understanding the role of the Stakeholders

- Informative
- Consultancy
- Involvement
- Fundamentally collaborated

Stakeholders' involvement

The Action Plan with four distinct levels of governance for stakeholder type (< *HARMON, 2019*), namely:

- Policy and strategy;
- Planning and environmental impact assessment;
- Implementation and management and,
- Level of education, awareness, consultation, and communication.

Stakeholders' involvement

These levels of governance are further split into four administrative levels:

- International;
- Continental/Regional;
- National, and
- Local (including states, counties, regions and/or provinces).

... Try to implement the Strategy?

Stakeholders' involvement

Constant engagement!

Local working groups > development of CSOPs
Transnational workshops

Data exchange

Test, use the tools

Implement the concrete actions (monitoring, ...)

Needs & resources > know-how exchange, networking,
capacity building, communication

Transnational workshops

4. Transnational workshops

5 workshops for AT-CZ, HU-SK, RO, BG, and UA, by 06.20200
+ IENE International Conference (09.2022 - Cluj Napoca, RO)

Local working groups > finalize the CSOPs
PP's repres., & international experts

"think globally, act locally"

Highly efficient
Learning by doing & networking
Preparation!

Next steps & Open discussion

5. Next steps & Open discussion

Pilot area description & Pilot area assessment

Draft (theoretical) local CSOPs –

Threats>Objectives>Stakeholders

Stakeholder analysis, potential local working groups

CSOPs – monitoring needs <> WP T1

Data base structure

On-line Library structure
