

WACOM

Pregled sistema za izmenjavo informacij in usklajevanje udeležencev v izrednih razmerah (Sistem vodenja odziva - ICS) s posebnim poudarkom na elementih: 207 (Organizacijska struktura incidentov), 209 (Povzetek stanja incidenta) in IAP (Načrt odziva na dogodek)

WACOM national workshop Slovenia
May 27th, 2021

History of the ICS:

The ICS concept was formed in 1968 at a meeting of Fire Chiefs in Southern California. The program was built primarily to take after the management hierarchy of the US Navy and it was mainly for fire fighting of wildfires in California. During the 1970s, ICS was fully developed during massive wildfire suppression efforts in California (FIRESCOPE) that followed a series of catastrophic wildfires, starting with the massive Laguna fire in 1970. Property damage ran into the millions, and many people died or were injured. **Studies determined that response problems often related to communication and management deficiencies rather than lack of resources or failure of tactic.**

ICS (definition):

A standardized on-scene emergency management construct specifically designed to provide for the adoption of an integrated organizational structure that reflects the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries. ICS is the combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure, designed to aid in the management of resources during incidents. It is used for all kinds of emergencies and is applicable to small as well as large and complex incidents. ICS is used by various jurisdictions and functional agencies, both public and private, to organize field-level incident management operations.

ICS (definicija):

Standardiziran niz vsebin za obvladovanje izrednih dogodkov na kraju samem, posebej zasnovan za zagotovitev vzpostavitev povezane organizacijske strukture, ki odraža zapletenost in zahteve posameznih ali več incidentov, ne da bi ga pri tem ovirale meje pristojnosti. ICS je kombinacija lokacij, opreme, osebja, postopkov in komunikacij, ki delujejo v skupni organizacijski strukturi in so zasnovani kot pomoč pri upravljanju virov med incidenti. Uporablja se za vse vrste nujnih primerov in je primeren za manjše kot tudi večje in zapletene incidente. ICS uporablja institucije različnih pristojnosti in nivojev, tako javne kot zasebne, za organizacijo operacij upravljanja z izrednimi dogodkimi na samem terenu.

ICS Principles:

ICS consists of a standard management hierarchy and procedures for managing temporary incident(s) of any size. ICS procedures should be pre-established and sanctioned by participating authorities, and personnel should be well-trained prior to an incident.

ICS includes procedures to select and form temporary management hierarchies to control funds, personnel, facilities, equipment, and communications. Personnel are assigned according to established standards and procedures previously sanctioned by participating authorities. ICS is a system designed to be used or applied from the time an incident occurs until the requirement for management and operations no longer exist.

Načela ICS:

ICS je sestavljen iz standardne hierarhije upravljanja in postopkov za upravljanje začasnih incidentov katere koli velikosti. Sodelujoči organi bi morali vnaprej določiti in uveljaviti postopke ICS, osebje pa bi moralo biti dobro usposobljeno pred incidentom.

ICS vključuje postopke za izbiro in oblikovanje začasnih (dinamičnih) hierarhij upravljanja za nadzor sredstev, osebja, objektov, opreme in komunikacij. Osebje se razporedi v skladu z uveljavljenimi standardi in postopki, ki so jih predhodno opredelili sodelujoči organi. ICS je sistem, ki je zasnovan za uporabo ali uporabo od trenutka, ko se zgodi incident, do tedaj, ko potrebe po upravljanju in operacijah več.

ICS je interdisciplinaren in organizacijsko prilagodljiv, da se odzove na naslednje izzive upravljanja: :

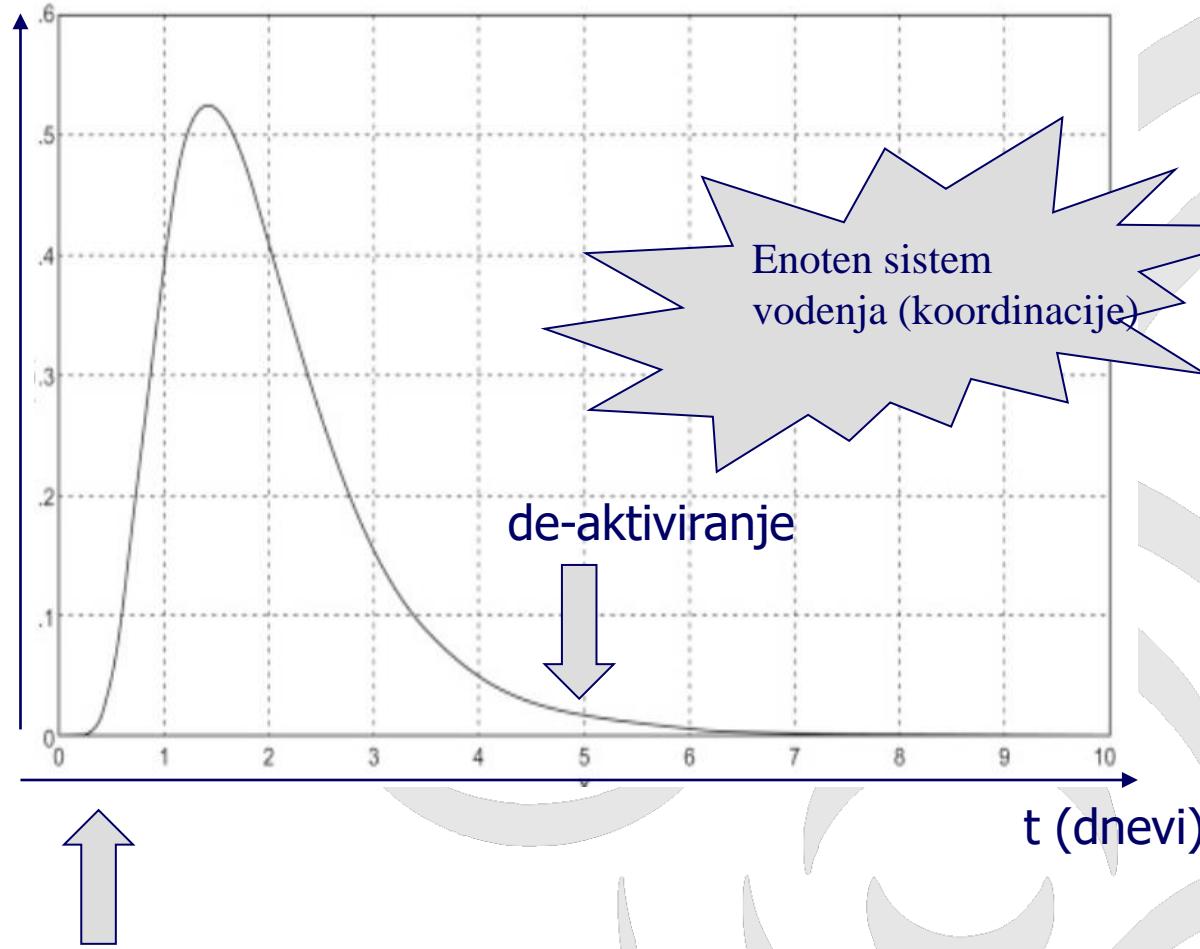

- Izpolnjuje potrebo po pooblastilih za obravnavanje kakršnih koli incidentov ali zapletenosti (tj. širitev/krčenje in prilagajanje po potrebi).
- Osebju iz številnih agencij omogoča hitro združitev v skupno strukturo upravljanja/vodenja s skupno terminologijo.
- Zagotavlja logistično in upravno podporo operativnemu osebju.
- Je učinkovit in se izogiba podvajanju naporov in dodatnih stroškov.
- Ne glede na kompleksnost dogodka vzpostavlja eno samo, centralno pooblaščeno organizacijo za nujne primere.

Izziv upravljanja z izrednimi stanji:

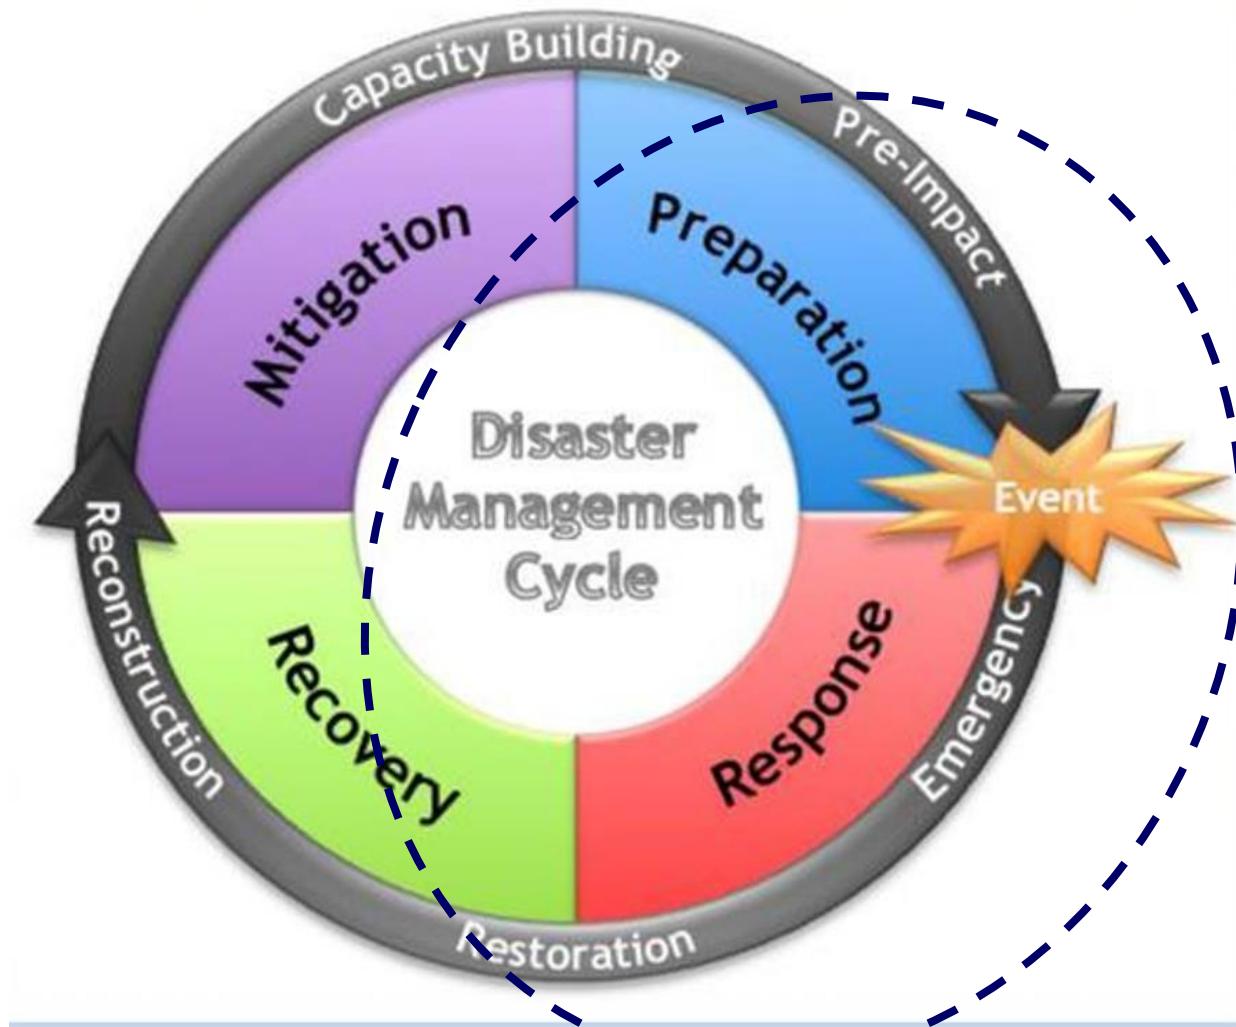

Razpon kontrole (span of control), situacijsko zavedanje, pooblastila za odločanje na različnih nivojih?

Aktivirani viri

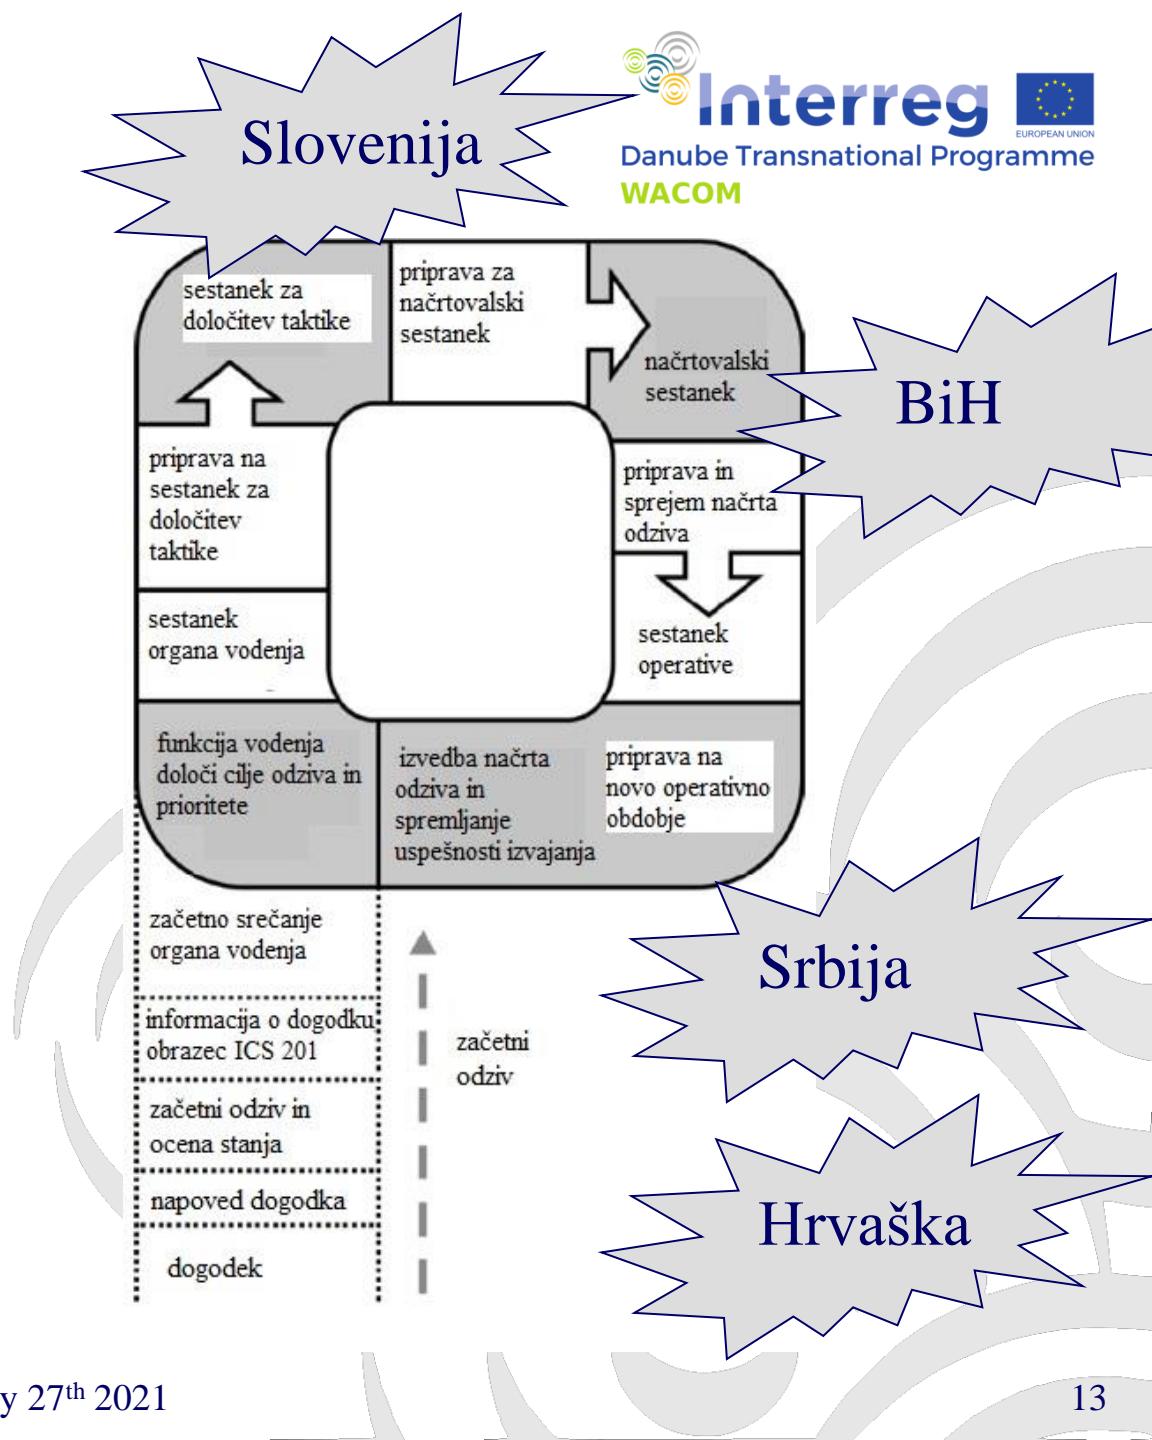

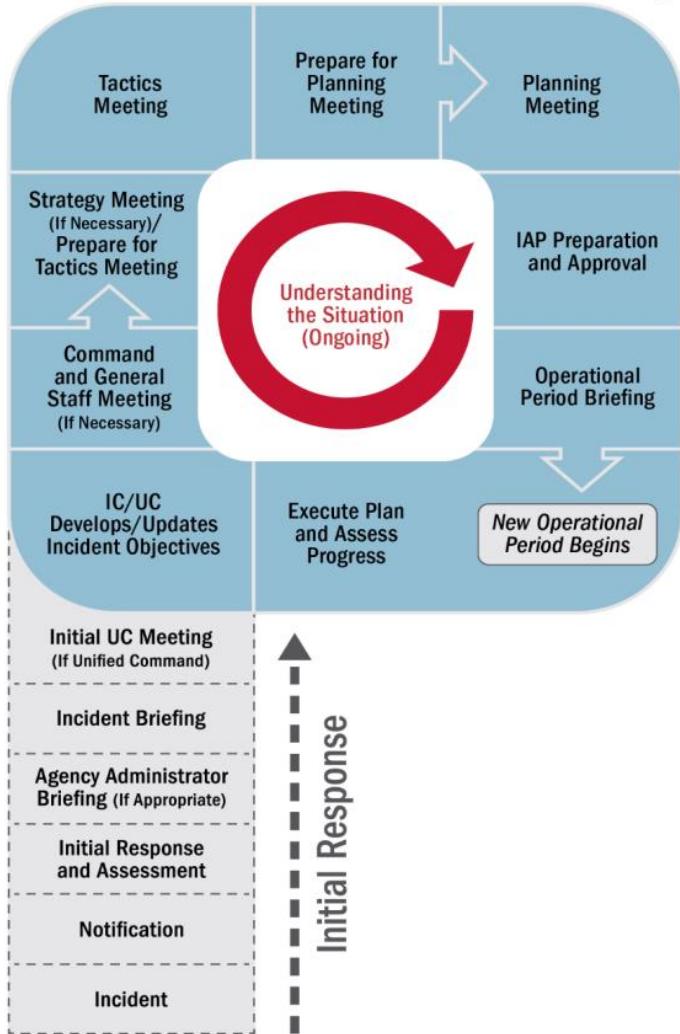

Aktivacija /mobilizacija

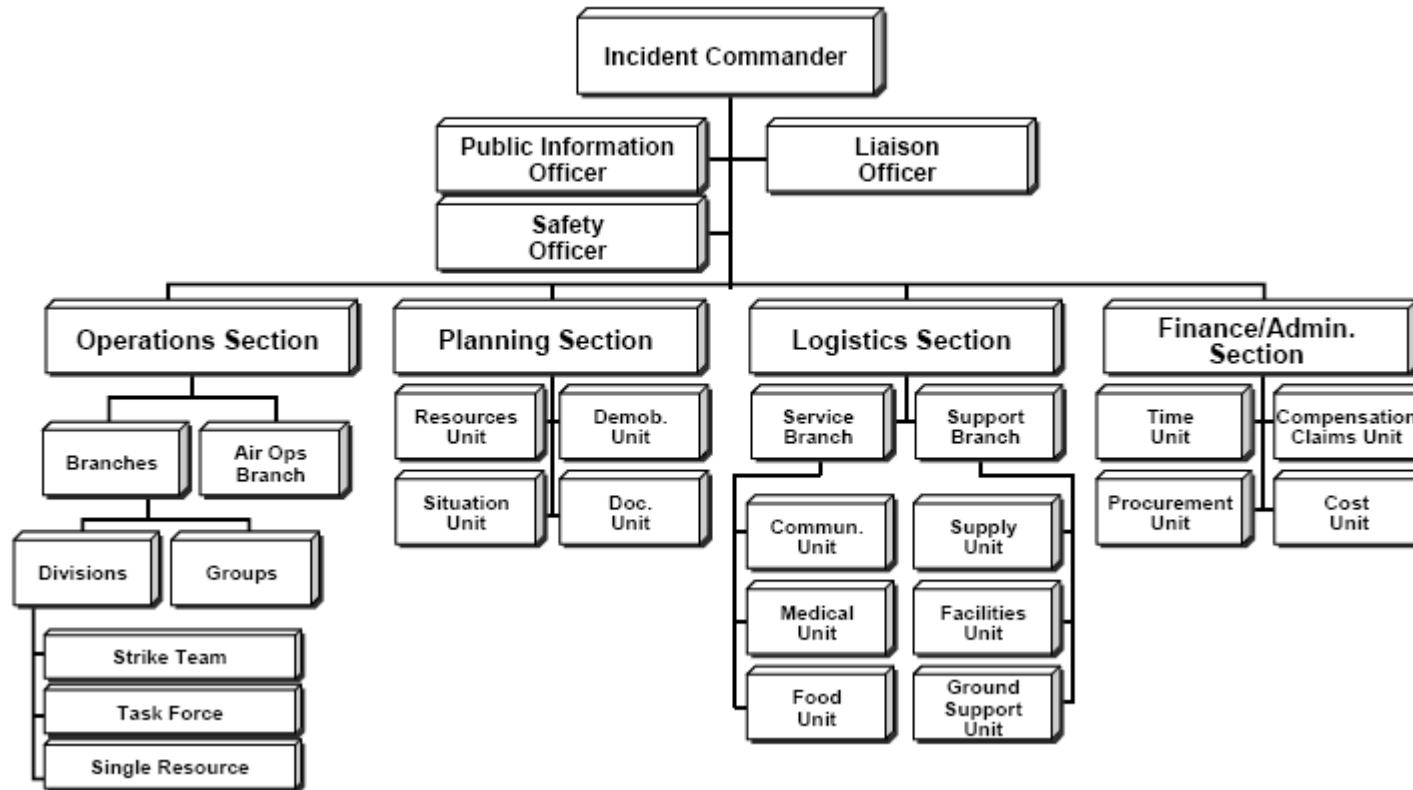

Cikel vodenja nesreč:

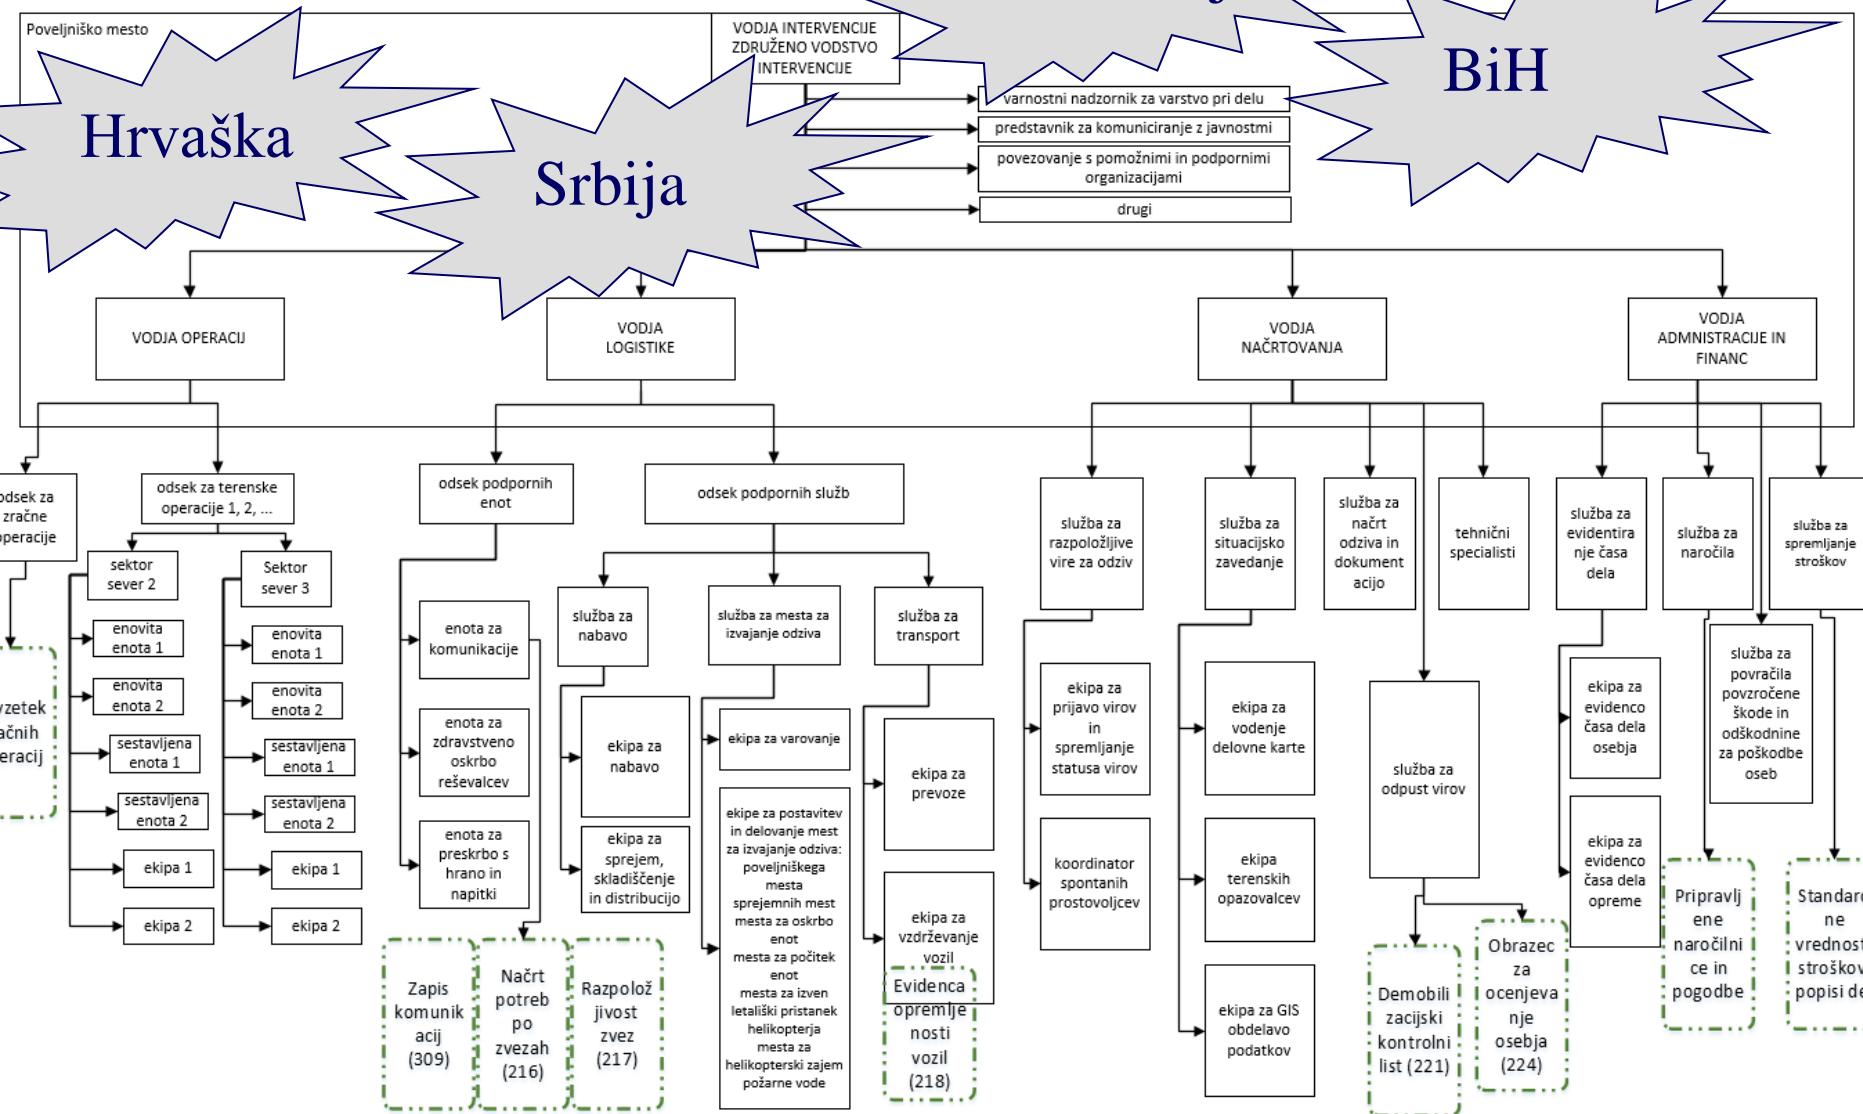

Planning „P“ -

ICS / NIMS - Osnovni okvir za vodenje intervencije

ICS – povezovanje, usklajevanje

WACOM TOOLBOX in ICS

- Standardne definicije (terminologija)
- Prizadevanje za združljivost s sistemom ICS / NIMS - zato si prizadeva za minimalno združljivost med 4 nacionalnimi sistemi za obvladovanje incidentov in zapletenostjo njihovih struktur
- Povratne informacije - izobraževanje struktur glede na določene vloge v ICS
- Obravnava samo ciljno usmerjenih komponent ICS (ne vseh)
 - » Kdo je kdo? (207)
 - » Kaj se dogaja in napovedi za 24, 48 in 72 ur (209)
 - » Kaj bomo počeli jutri / danes „Načrt odziva“
- Usposabljanja

KOMUNIKACIJA

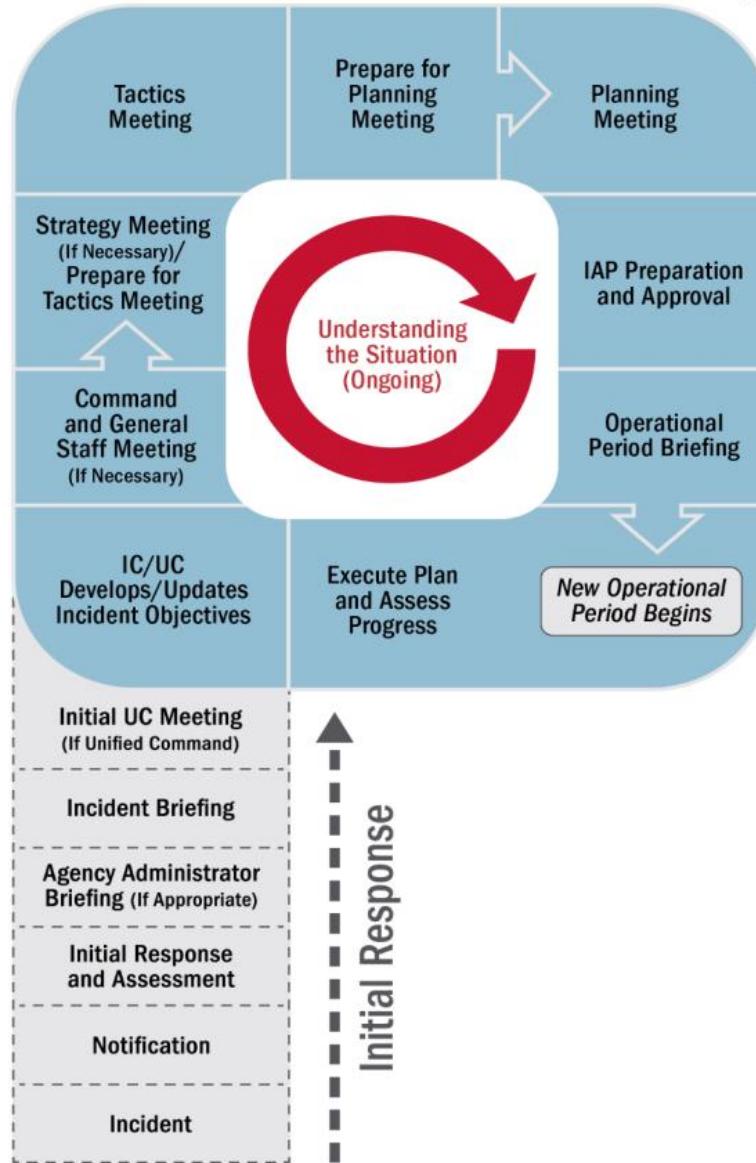

- Standardizirane komunikacijske vsebine (obrazci ICS 201 do 235).
- Standardizirana komunikacijska struktura - obvezna priprava (kdo), obvezna potrditev (kdo), obvezen prejemnik (kdo)
- Omogočanje in arhiviranje celotne komunikacije (dokumentacijske enote) za poznejšo analizo dogodkov

KOMUNIKACIJA (vsi obrazci – standardizranost vsebin)

KOMUNIKACIJA

OBRAZCI (201-309)

Za potrebe informiranja vseh deležnikov (vsi nivoji, vse aktivirane institucije)

Se umeščajo v 24-urni cikel

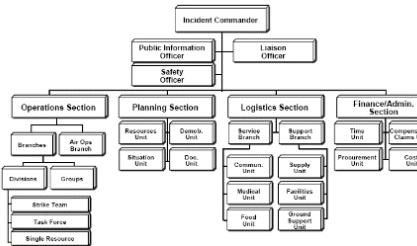

KOMUNIKACIJA – standardne vsebine (priprava, posredovanje)

ICS 201
Incident Briefing

ICS 202
Incident Objectives

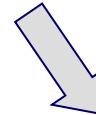

ICS 203
Organization Assignment List

ICS 207
Incident Organization Chart

Standardno: na tabli

Sodobno: na spletni aplikaciji

Purpose. The Incident Organization Chart (ICS 207) provides a **visual wall chart** depicting the ICS organization position assignments for the incident. The ICS 207 is used to indicate what ICS organizational elements are currently activated and the names of personnel staffing each element. An actual organization will be event-specific. The size of the organization is dependent on the specifics and magnitude of the incident and is scalable and flexible. Personnel responsible for managing organizational positions are listed in each box as appropriate.

Preparation. The ICS 207 is prepared by the Resources Unit Leader and reviewed by the Incident Commander. Complete only the blocks where positions have been activated, and add additional blocks as needed, especially for Agency Representatives and all Operations Section organizational elements. The ICS 207 is intended to be used as a wall-size chart and printed on a plotter for better visibility. A chart is completed for each operational period, and updated when organizational changes occur.

Distribution. The ICS 207 is intended to be **wall mounted** at Incident Command Posts and other incident locations as needed, and is not intended to be part of the Incident Action Plan (IAP). All completed original forms must be given to the Documentation Unit.

KOMUNIKACIJA – standardne vsebine (priprava, posredovanje)

ICS 208
Safety Message/Plan

ICS 209
Incident Status Summary

Pomembno za projekt WACOM, vertikalno poročanje (od spodaj navzgor) in povezovanje - stanja (izredno onesnaženje, poplave in napoved - zlasti potrebe po virih)

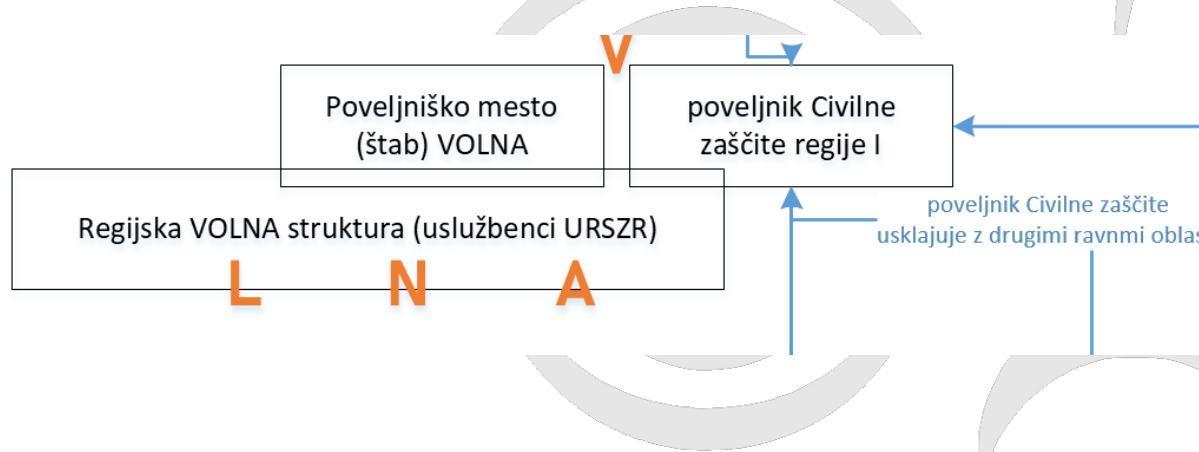

Purpose. The ICS 209 is used for reporting information on significant incidents. It is not intended for every incident, as most incidents are of short duration and do not require scarce resources, significant mutual aid, or additional support and attention. The ICS 209 contains basic information elements needed to support decision-making at all levels above the incident to support the incident. Decision makers may include the agency having jurisdiction, but also all multiagency coordination system (MACS) elements and parties, such as cooperating and assisting agencies/organizations, dispatch centers, emergency operations centers, administrators, elected officials, and local, County, Provincial, and Federal agencies. Once ICS 209 information has been submitted from the incident, decision makers and others at all incident support and coordination points may transmit and share the information (based on its sensitivity and appropriateness) for access and use at local, regional, provincial, and national levels as it is needed to facilitate support.

Accurate and timely completion of the ICS 209 is necessary to identify appropriate resource needs, determine allocation of limited resources when multiple incidents occur, and secure additional capability when there are limited resources due to constraints of time, distance, or other factors. The information included on the ICS 209 influences the priority of the incident, and thus its share of available resources and incident support.

The ICS 209 is designed to provide a “snapshot in time” to effectively move incident decision support information where it is needed. It should contain the most accurate and up-to-date information available at the time it is prepared. However, readers of the ICS 209 may have access to more up-to-date or real-time information in reference to certain information elements on the ICS 209. Coordination among communications and information management elements within ICS and among MACS should delineate authoritative sources for more up-to-date and/or real-time information when ICS 209 information becomes outdated in a quickly evolving incident.

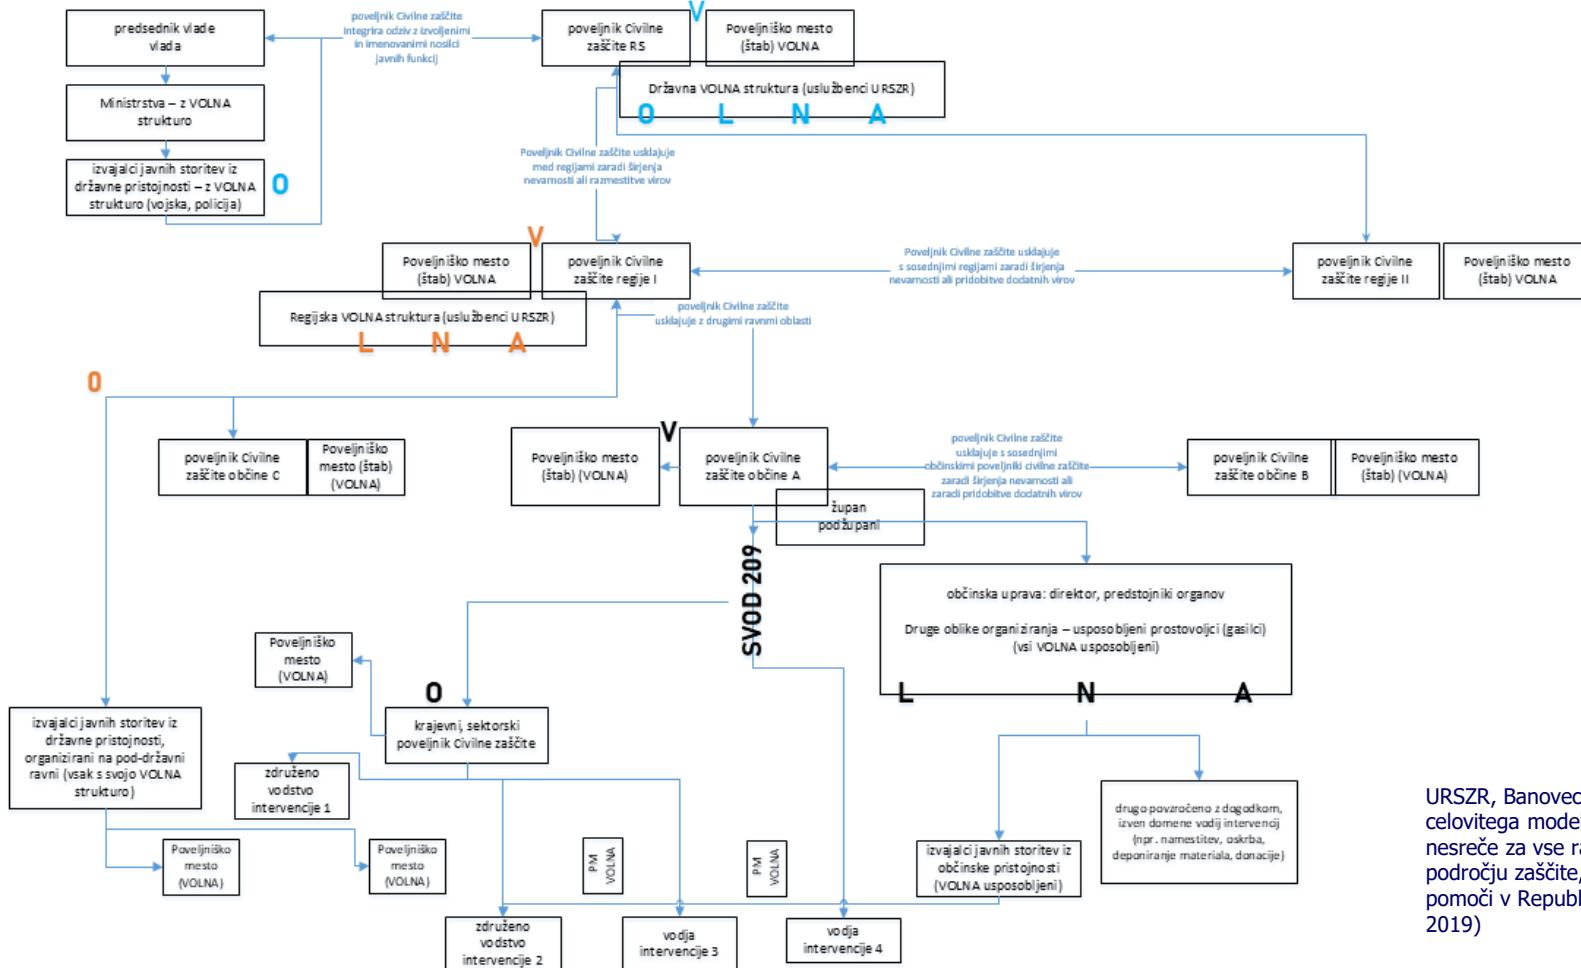

Prilagajanje postopkom prilagajanja so trenutno v teku (primer: Slovenija)

- Incident Command System → Sistem Vodenja ODziva (ICS → SVOD)
- Incident Command – Operations – Logistics – Planning – Administration → VOLNA Vodenje, Operativa, Logistika, Načrtovanje, Administracija.

Prilaganje postopkom prilaganja, ki so trenutno v teku (primer: Slovenija)

SVOD - model vertikalnega komunikacijskega toka

URSZR, Banovec P. : Oblikovanje celovitega modela vodenja odziva na nesreče za vse ravni vodenja na področju zaščite, reševanja in pomoči v Republiki Sloveniji (2017-2019)

Prilagajanje postopkom prilagajanja, ki so trenutno v teku (primer: Hrvaška)

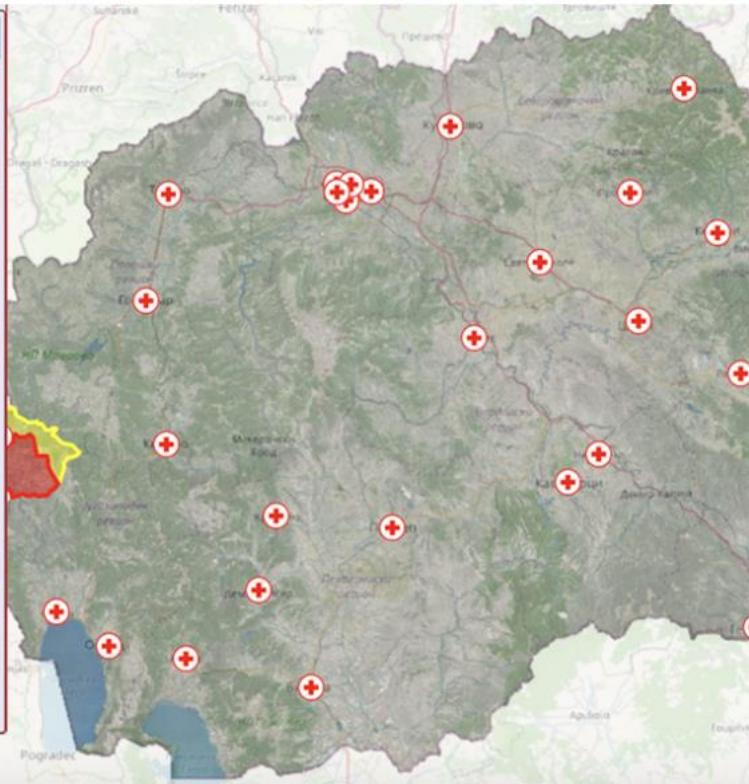

Emergency-coordination system from Lincoln Laboratory supports Covid-19 response

North Macedonia is using the Next-Generation Incident Command System to coordinate emergency services and inform the public about Covid-19 cases.

WACOM – ICS - ZAKLJUČKA

Incident command system – (Slovenija: Sistem Vodenja ODziva - SVOD; Hrvaška: NICS)

- Gre za standardiziran, vendar dinamično prilagodljiv model dela in komunikacij
- Se vzpostavi in uporablja se v vsaki organizaciji, ki je dejavna v katerem koli zapletenem okviru načrtovanja / odzivanja

RAZMISLEK:

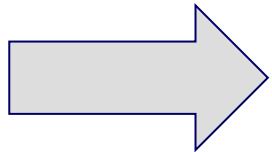

- Kako gledate na izvajanje modela odzivanja in obvladovanja nesreč ICS za svojo realnost in svojo institucijo
- Obstojče strukture in procesi v institucijah običajno ustrezano modelu ICS, vendar zahtevajo določene prilagoditve

WACOM – WP2

Izhodišča za delo po skupinah:
