Art Nouveau in Serbia that no longer exists / short documentary

- The video will deal with Art Nouveau buildings that were destroyed after some time or are in such poor condition that their Art Nouveau outfit is unrecognizable.
- We will use archival material, old photographs and drawings, newspaper clippings, possible animations, current condition (or condition of buildings built on that specific site)
- In our case, 7 buildings will be included, in Belegrade, Beočin (small town near Novi Sad), Aleksa Šantić (vilage near Sombor) and Subotica.
- The general approach would be in some ways provocative with a fairly fast editing and dynamic sound background
- The main goal would be to try to raise awareness about saving the Art Nouveau heritage by comparing buildings that still exist (even in a such desperate state) with buildings that have been irretrievably lost.
