

Danube Transnational Programme

DANUBE STREAM_Final event
Budapest, 19.09.2019

A stream of cooperation

Expected results:

- Better connected and inter-operable environmentally-friendly transport systems
- **Better integrated policies and practical solutions to further develop waterways while limiting negative impact of the transport systems on the Danube eco-system**
- Development of multimodal hubs, terminals and links
- Safer transport network
- Better organised public transport
- Promotion of sustainable modes of transport

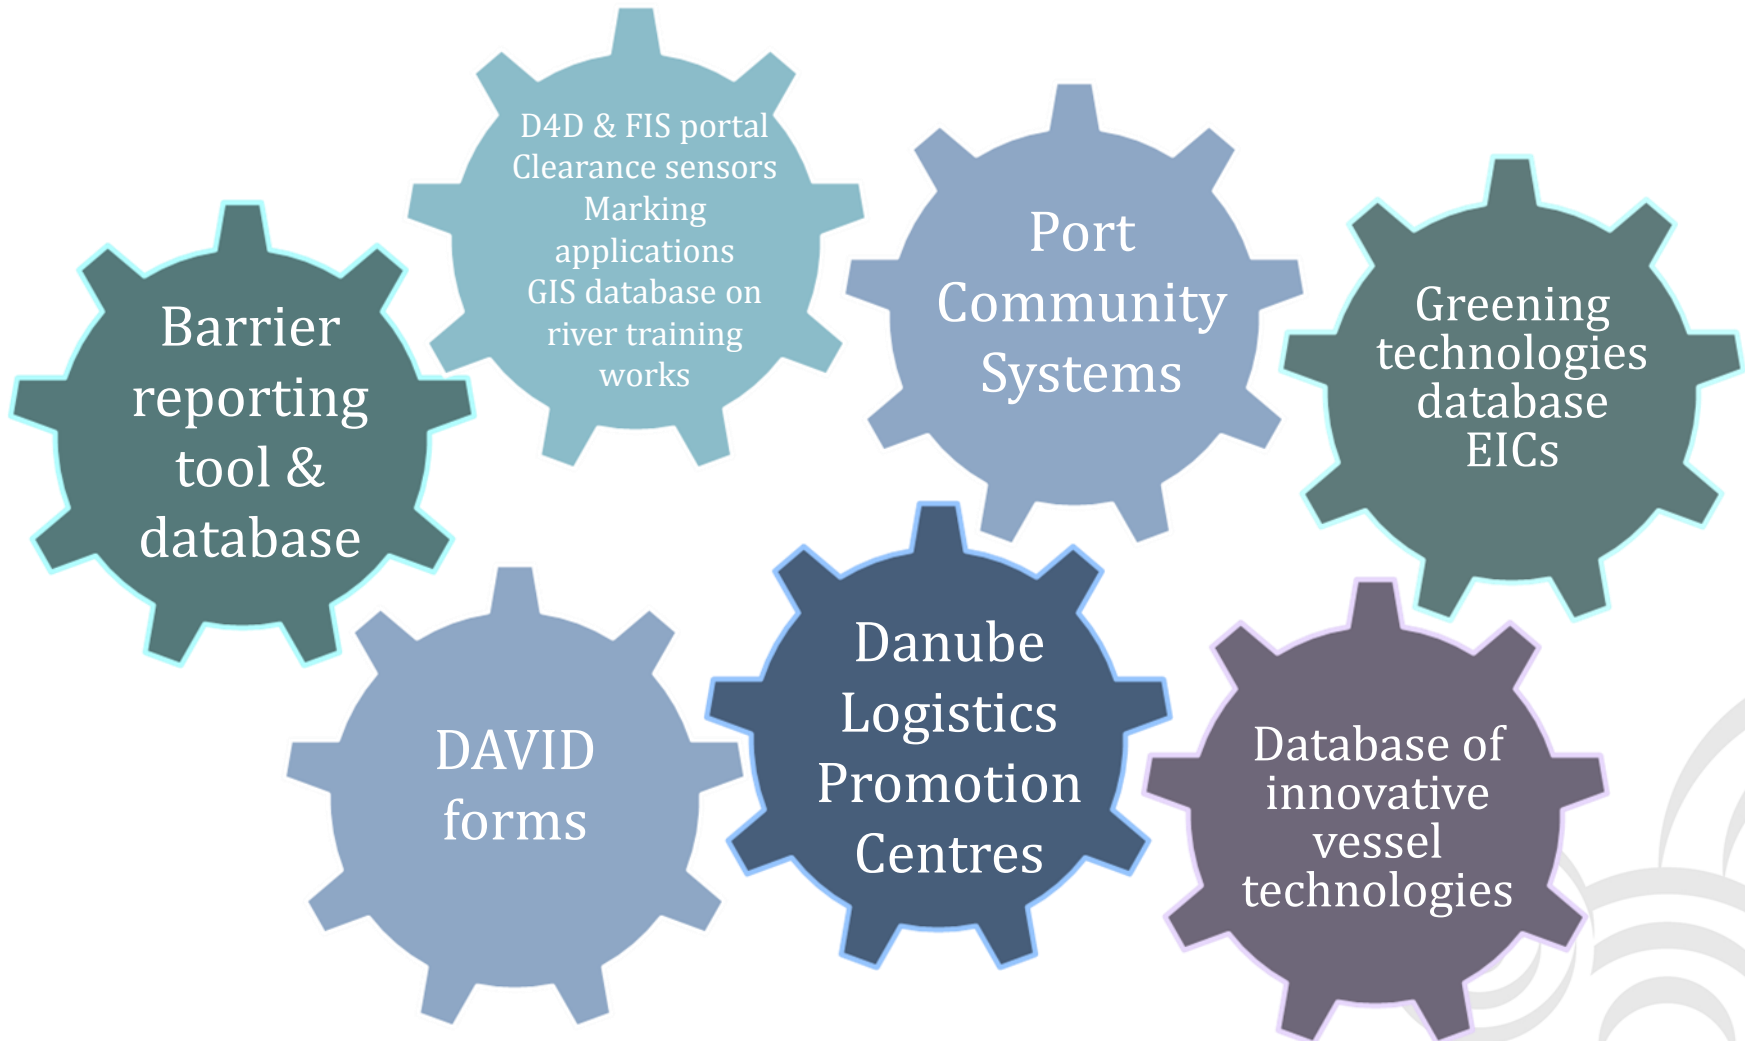

Expectations vs Outcomes

EXPECTATIONS

OUTCOMES

- Prove added value as compared to the two previous projects
- Provide tangible and easily-accessible navigational tools and aids
- Contribute to an efficient, safer and seamless navigation along the Danube
- Contribute to a more environmentally-friendly inland waterway transport
- Contribute to the harmonisation of services
- Contribute to the achievement of EUSDR PA1a targets
- Cooperate with other related projects or initiatives

Wheels in motion

GUIDELINES/ RECOMMENDATIONS/ CONCEPTS

Guidelines for improved administrative services
