

Programme co-funded by European Union funds (ERDF, IPA)

## Guidelines for the production of planting material for restoration of riparian forests

The booklet is available for download at: <https://dx.doi.org/10.20315/SFS.170>

The aim of the booklet is to provide you guidance on the selection of seed sources, seed collection and processing, promotion of genetic diversity and good nursery conditions for the production of forest reproductive material, i.e. seed, plant parts and plants in riparian forests.

Using the advice provided will ensure sustainable artificial regeneration, that is as close as possible to the natural one.
