

D.T4.2.2

Feedback report on Co-Creation workshop: FINANCING BIOECONOMY PROJECTS CROATIA

PP11 (CWC) and PP12 (MEEC)
06 / 2022

Project Information

Project Title: GoDanuBio - 'Participative Ecosystems for fostering the revitalization of rural-urban cooperation through governing Danube Circular Bioeconomy'

Project code: DTP3-471-4.1

Lead partner: BIOPRO Baden-Württemberg GmbH

Start of the project: 01/07/2020

Duration: 30 months

<http://www.interreg-danube.eu/approved-projects/godanubio>

Deliverable Information

Author/-s: PP11 (CWC) and PP12 (MEEC)

Deliverable no.: D.T4.2.2.

Submission date: 30/06/2022

Dissemination level: Public

1. General information about the co-creation workshop

Date of the workshop	18.02.2022
Topic of the workshop	Financing of bioeconomy projects
Format of the workshop	Hybrid (Zagreb)
Region/Adress	City of Zagreb
Project partner(s) involved	Croatian Wood Cluster, Ministry of economy and sustainable development
Guiding question/theme of the workshop	How to finance bioeconomy projects?
Number of participants	46
Type of participants (Target groups) ¹ and name of institutions	<p>Competence Center Vinkovci</p> <p>Ministry of agriculture</p> <p>Faculty of machinery and boatbuilding</p> <p>Ministry of economy and sustainable development</p> <p>Regional development agency of Vukovar-srijem county</p> <p>Tourist board of Zagreb county</p> <p>Faculty of agronomy</p> <p>Croatian Chamber of Agriculture</p> <p>Splitsko-dalmatinska county</p> <p>Green consulting Ltd.</p> <p>Environment protection and energy efficiency fund</p> <p>Ličko-senjska county</p> <p>Regional development agency of Karlovačka county</p> <p>Local development agency PINS</p> <p>Cluster Lika Destination</p> <p>Unikom Ltd.</p> <p>Sisacko-moslavacka county</p> <p>Green energy association</p> <p>EUVITA cluster</p> <p>Faculty of agrobiotechnical science</p> <p>Spin Valis Ltd.</p> <p>Agrivi Ltd.</p> <p>Municipality of Darda</p> <p>Municipality of Velika</p> <p>Eurofins Croatiacontrol Ltd.</p>

¹ Please group the target groups according to the ones listed in page 42 of the Application Form

	Karlovac county Tera Tehnopolis Ltd. Municipality of Kraljevec on Sutla Croatian electricity company
Cooperation with experts (i.e. speakers, external moderators, politician...)	The workshop was organized together with an external expert, prof. PHD Biljana Kulisic, and in cooperation with BioEastUp project

2. Objective of the workshop

The main objective of the workshop was twofold:

- 1) To validate the findings and results of surveys conducted in the past 2 years organized by BioEastUp project. The surveys intended to identify possible development of bioeconomy in Croatia.
- 2) To introduce possible financing sources for bioeconomy projects in Croatia

The event was focused on possible financing sources as well as resources that are or could be on disposal to the production companies. The present representatives of local and regional administration, as well as companies expressed interest in the topic, but also emphasized the great gap that is present on the market in terms of available knowledge and experience.

3. Initial situation of your region

The question on how to finance bioeconomy projects is one of the most relevant for the market actors, especially SMEs.

Financing projects is always a challenge, especially when it comes to bioeconomy projects that often arise as a result of cooperation between several sectors. Namely, the circular and sustainable bioeconomy relies on regional natural potentials, but the cooperation with the IT sector is becoming more and more important when it comes to the question how to prepare farmers and foresters and related industries for market disruptions, climate change and increased competitiveness.

The pressure of environmental issues as well as of numerous EU regulation encourage local companies to use resources in a smarter way. However, the transition from traditional way of production to bioeconomy models requires not only transfer of knowledge, but also significant financial support, especially to small and medium companies.

4. Methods used within the workshop

The workshop was organized during COVID-19 pandemics and therefore in hybrid form. Many of the participants were present online, so the main methods were:

1. Presentation (Powerpoint)
2. Mentimeter evaluation
3. Discussion.

The chosen methods worked well in practice. Participants were experienced with the online tools, but since the tools are user-friendly, they are to be recommended for this kind of events and objectives.

5. Lessons learned for next upcoming workshops

This workshop was the first workshop organized in the cooperation with BioEastUp project, which enabled to reach almost all relevant stakeholders without repeating the subjects and topics.

The lessons learned will be assessed and considered for the next workshop round.

6. What did the local or/and regional administration and the citizens expect from the process of participative governance?

Participative governance is not an unknown topic in Croatia. However, more practice is needed to improve the process of meeting decisions by using participative governance method. Since the topic of the workshop was mainly intended for SMEs and business society in general, no citizens were present at the workshop. The participants expected to gain new knowledge linked to bioeconomy project financing, but also to share their experience and information about use of biomass on the Croatian market.

7. Outcome of the co-creation workshops

The participants were informed about possible financing sources of bioeconomy projects. The main outcome of the workshop was a fact that participants were put in the position to discuss about possibilities how to finance bioeconomy projects in a direct way. The workshop managed to contribute to the increase of institutional capacity of local/regional administration. The workshop showed that there is a knowledge gap present among business society, when it comes to the financing of bioeconomy project, and that there is a need on more opportunities/events that will cover this and similar topics.

8. Innovation potential for your region

According to the European Innovation Scoreboard 2022, Croatia is an Emerging Innovator with performance at 66.5% of the EU average. Performance is above the average of the Emerging Innovators (50.0%). Performance is increasing (15.5%-points) at a rate higher than that of the EU (9.9%-points). The country's performance gap to the EU is becoming smaller. However, resource productivity index decreased compared to 2021 (8.8%), although increase in the period of 2015-2022 (15.6). Croatia has a competitive advantage of joining the transition towards sustainable and circular bioeconomy but there are challenges to keep up with the dynamics of the EU trends, and development of bioeconomy policies which is mainly influenced by the following factors:

- weak coordination among different sectors
- lack of communication between the public and private actors
- educational system not being prepared to support the transition to circular bioeconomy
- fragile regional innovation system
- lack of leadership capacities as well as vision among regional development stakeholders.

9. Do you plan to use the process of participative governance also in future?

The process of participative governance is one of the essential processes when it comes to the transition from linear to circular bioeconomy. The involvement of the general public is crucial for that transition, too. The participative governance method is however more accepted on the regional level, i.e. in the situations where there are topics to be discussed that directly influence general public. In Croatia, bioeconomy topics are still not considered as topics that general public could contribute. Therefore, all governmental and policy makers' efforts are directed towards business society.

10. Identified opportunities for rural development in your region

Finding ways how to finance projects in rural areas is crucial when it comes to the transition from linear to circular bioeconomy. Financing of these projects must be aligned with all other policies developed for rural regions, especially with investments in infrastructure. The following workshops will be dedicated to the identification of opportunities for rural development in several Croatian regions. Since Croatia only started to develop bioeconomy strategy, no concrete projects could be identified. However, the discussion during the workshop has pointed out possible directions and sectors in which bioeconomy projects could be developed.

Opportunities that R&D activities are offering to the development of bioeconomy in Croatia (Top 5):

1. Involvement of services in the promotion of products that come from low-carbon emission production and other sustainable products
2. Green and digital transition
3. Pilot projects that connect academy, public sector, and private investors
4. Better use of funding opportunities
5. Faster economy growth in 5 years after adopting bioeconomy principles

The participants have also identified threats to the transition towards bioeconomy system:

1. Unfavourable demography trends and lack of skilled workforce
2. Unefficient coordination among policies, R&D community, and administration
3. Lack of bioeconomy experts and consultants
4. Lack of motivation and habit of lifelong learning
5. Lack of flexibility and adoption of new educational curriculum

11. Annexes

Poštovani,

danas je zadnji dan za prijavu sudjelovanja na **2. tematsku radionicu o bioekonomiji u RH.**

Zahvaljujemo svima koji su se dosad prijavili (poveznica za sudjelovanje bit će dostavljena krajem današnjeg dana) te Vas obavještavamo da će nam se u radu pridružiti i **dr. sc. Tajana Radić (EIP-AGRI Head of Division D: Strengthening the socio-economic fabric of rural areas & HPK)** koja će predstaviti izvore financiranja za tranziciju na kružnu i održivu bioekonomiju.

U nastavku ostale informacije o održavanju:

Mjesto i vrijeme održavanja - hibridno:

Uživo: Petak 18.2., u hotelu Westin u Zagrebu, od 13.00 do 15.00 sati

Online (poveznica za sudjelovanje bit će dostavljena danas do kraja dana, po zaprimanju [prijave za sudjelovanje](#))

Program:

13.00-13.15	Registracija
13.15-13.35	Pozdravne riječi i uvod: Pregled rezultata rada iz prethodne radionice (održana 14.12.2021.)
13.35-13.45	Pitanja i odgovori
13.45-14.15	Validacija SWOT analize
14.15-14.30	Pitanja i odgovori
14.30-15.00	Primjenjivost SWOT analize u hrvatskim regijama
15.00-15.15	Pitanja i odgovori / Zaključci i najava sljedeće radionice

Za razmišljanje i pripremu:

Kružna i održiva bioekonomija se oslanja na regionalne prirodne potencijale, a u suradnji s IT sektorom pronalazi načine kako da se poljoprivrednici i šumari te vezana industrija pripreme za tržišne poremećaje, klimatske promjene te povećaju konkurentnost.

- Može li bioekonomija promijeniti negativan migracijski trend?
- Kako irski poljoprivrednik stvara 2 puta veću, a finski za 50% veću dodanu vrijednost od hrvatskog poljoprivrednika?
- Zašto finsko šumarstvo ostvaruje 12 puta veću dodanu vrijednost od hrvatskog?

Ciljevi 2. Tematske radionice:

- Validacija SWOT analize i njezine primjenjivosti u pojedinim hrvatskim regijama
- Promišljanje o prirodnim resursima i njihovoj iskoristivosti
- Identifikacija sudionika zainteresiranih za osmišljavanje regionalnih projekata

Predavačica:

Doc. dr. sc. Biljana Kulišić, nacionalna koordinatorica za Obzor 2020 BIOEASTsUP iz Energetskog instituta Hrvoje Požar koja je radila kao neovisni stručnjak za temu biogospodarstva pri Europskoj komisiji - Direktorat Istraživanje i inovacije (2020.-2021.)

PRIJAVNICA

Sudjelovanje je moguće bez naknade, ali uz prethodnu prijavu putem [online prijavnice](#) (troškove snose organizatori). Po primitku prijavnice, organizator će Vas obavijestiti o statusu prijave te sukladno tome dostaviti ostale detalje potrebne za sudjelovanje.

Radionica se održava nastavno na konferenciju Lokalne i demografske razvojne mjere u organizaciji časopisa Komunal. [Više...](#)

Za sva ostala pitanja i prijedloge stojimo na raspolaganju.

Srdačan pozdrav,

Organizatori

Ministarstvo gospodarstva i održivog razvoja RH - Služba za EU politike teritorijalne suradnje i makroregionalnog razvoja, Uprava za programe i projekte EU, europske i međunarodne poslove
Hrvatski drveni klaster - Odjel za projekte i međunarodnu suradnju

Dodatne informacije za one koji nisu sudjelovali u prethodnoj radionici:

Ministarstvo gospodarstva i održivog razvoja u suradnji s Hrvatskim drvnim klasterom te projektom BioeastUp organizira seriju tematskih radionica na temu prelaska RH na sustav biogospodarstva, s glavnim ciljevima:

- Identifikacija resursa i izvora financiranja projekata na području RH
- Jačanje suradnje svih dionika u procesu prelaska RH na kružnu bioekonomiju
- Osmišljavanje projekata koji počivaju na načelima biogospodarstva na regionalnoj razini.

ZAŠTO JE BIOEKONOMIJA DOBAR KONCEPT ZA RH?

Oživljavanje ruralnih područja i zaustavljanje negativnih demografskih trendova. Republika Hrvatska suočena je s velikim sociološkim promjenama, naročito vezanih uz demografsku transformaciju. Mladi napuštaju ruralna područja zbog boljih mogućnosti zapošljavanja u urbanim sredinama. Za oživljavanje ruralnih područja i aktiviranje potencijala potreban je pristup koji uključuje participativno upravljanje i aktivaciju institucionalnih kapaciteta. U tom procesu koncept kružnog biogospodarstva koristi se kao alat koji može poduprijeti regionalni razvoj, odnosno osigurati tranziciju gospodarstva, temeljenog na fosilnim gorivima, prema gospodarstvu koje koristi biološke resurse u održivoj proizvodnji.

Razvoj regija i zaštita okoliša. Dugoročni cilj takvih promjena je unaprijediti socio-ekonomski status regija, doprinijeti zaštiti okoliša, klime i resursa, kao i unaprijediti daljnji razvoj ruralnih područja. Za uspješnost tog procesa potrebno je uključiti sve interesne skupine, zainteresiranu javnost, akademsku zajednicu, predstavnike industrije te donositelje odluka koji do rješenja trebaju doći formirajući novi ekosustav koji će zajednički donositi odluke i osmišljavati projekte kroz suradnju ruralnih i urbanih područja te uzimajući u obzir načela kružnog biogospodarstva.

CILJEVI

1. Adresirati relevantne teme za pokretanje javne diskusije
2. Okupiti interesne skupine koje sudjeluju u donošenju odluka
3. Analizirati resurse, prednosti i slabosti pojedinih regija u kontekstu prelaska gospodarstva na kružno biogospodarstvo

SVRHA

1. Podržati interesne skupine u jačanju kapaciteta za participativno upravljanje
2. Identificirati moguće dugoročne scenarije suradnje u pojedinim regijama na strateškoj razini
3. Pokrenuti procese koncipiranja i financiranja projekata u RH na načelima biogospodarstva

PROFIL SUDIONIKA

- Predstavnici županija, gradova, općina
- Regionalne razvojne agencije, poduzetnički inkubatori, centri kompetencija, industrijski klasteri
- Tvrtke koje već primjenjuju neka od načela vezana za biogospodarstvo i/ili kružno (bio)gospodarstvo
- Nadležna ministarstva (MINGOR, MINPOLJ, MRRFEU, MZO)

UVJETI SUDJELOVANJA

Sudjelovanje je moguće bez naknade, ali uz prethodnu registraciju (troškove organizacije snose isključivo organizatori).

Napomena: Osim plenarnog izlaganja, predviđen je rad u grupama te diskusija među sudionicima. Stoga je broj sudionika ograničen (30-35 osoba). Ukoliko organizator zaprimi veći broj prijava, moguća je organizacija radionica u dodatnim terminima.

VRIJEME I MJESTO ODRŽAVANJA

Planirano je održavanje 4 radionice u periodu od prosinca 2021. do lipnja 2022.
