

## Regional Strategy Platforms

RSPs are setup on one per country basis to support communication & know-exchange for the development of eGUTS Standards and DTP eMob Strategy with already established local & regional actors, initiatives and platforms. It directly contributes to PSO3 as it strives to involve local and regional stakeholders while also contributing to PSO1 as inputs from Regional Strategy Platforms will feed into Danube eMOB Strategy.

The partners develop a detailed transnational agenda for each RSP meeting (per country) to allow for the integration of each meetings' feedback into eGUTS results and deliverables as continuous improvement. Main topics for the 5 RSP meetings are:

1. Presentation of the results and highlight coming from transnational feasibility studies
2. Input/updates on the implementation for the selected Pilot Actions in the country & the current version of eGUTS Standards
3. Presentation and Review of the Local Action Plans
4. Presentation and Review of 1st draft for DTP eMob Strategy
5. Presentation and Review of final draft of the DTP eMob Strategy
