1 Introduction

This document has been produced to capture and record the basic information needed to correctly direct and manage Thematic Pole 1: Innovative ecosystem for SMEs which is implemented as a part of Danube Transnational Programme (DTP) Capitalisation Strategy. The Pole 1 Roadmap addresses all fundamental aspects of the pole.

2 Background and additional documentation

Preparation of this document is based on the document DTP Capitalisation Strategy prepared by the DTP programme and sent on 17 of January 2017 to DTP lead project partners.

Concept paper states the importance of building upon past efforts and existing knowledge. This being the case, relevant and up-to-date knowledge, tools and partnerships which are appropriate for the development, implementation and dissemination of planned outputs and results are needed to build a solid ground for innovation and to avoid the duplication of efforts. By doing so, the existing disparities between regions and the uneven development of the cooperating regions will be more effectively addressed.

11 “Thematic Poles” have been established to enable projects to exploit and consolidate one another’s achievements, and create a higher leverage effect. This will enhance the visibility and impact of both projects and Programme. The DTP Capitalisation shall empower involved projects to improve the quality and sustainability of deliverables, strengthen their communication to common stakeholders, and enable the reinforcement of existing or forming of new cooperation networks and projects. In addition, DTP Capitalisation shall increase the knowledge of programming bodies about cooperation-gaps, territorial needs and/or potentials in the Programme area.

At this stage, there is no additional documentation needed or available for the execution of Thematic Pole activities.

3 Thematic Pole documentation

Considering the quantity of documentation related to the Thematic Pole, no common document management system is needed.

3.1 Document history

Following versioning rules apply for project documentation:

Table 1: Document history example

Version	Status	Date	Author	Comments
R-1.1	Revision no. 1	20.09.2013.	name_surname	Revision no. 1
F-1.0	Finalized	08.07.2013.	name_surname	Document finalized
D-0.2	Draft	26.06.2013.	name_surname	Changes based on meeting
D-0.1	Draft	06.06.2013.	name_surname	Document established, start draft

Version definitions:

D = Draft (in progress)

F = Finalized

R = Revision of finalized document

3.2 Templates and typography

Arial is chosen as the font to be used for all types of project documentation (Word documents) except for Power Point presentation where font Calibri shall be used. Visual Identity Guidelines provided by the DTP programme shall be followed.

3.3 Documentation handling

In general, there might be some documentation generated and circulated among TP partners. In such case or in the case if the TP will be using the Document Management Systems for centralised documentation storing, the following structure is proposed to be used (subject to change during implementation):

- **/1. Roadmap** – for storing this document, Thematic Pole Roadmap, which will be frozen once finalized. This folder will be used for storing Change logs in case of changes in the TP process.
- **/2. Thematic pole meetings** – for storing documentation related to TP meetings (meeting reports, photos, invitations, attendance lists. This folder has subfolders with the following names: / xxyyzz meeting_place (xx- year, yy- month, zz- day when the meeting was held).
- **/3. Thematic pole reporting** – for storing documentation related to reporting (if any).

- **/4. Deliverables** – for storing documents that are connected to TP deliverables. This folder has subfolders with following structure: /Deliverable Dx (x- number of the deliverable as specified in section 5). All supporting documentation related to the specific deliverable shall be stored in the same folder.
- **/5. Support documentation** – for storing documents important for the TP.

4 Thematic Pole definition

Thematic Pole 1 – Innovative ecosystem for SMEs has been defined as follows:

Innovative Ecosystem brings together organisations and partners whose main goal is to enable and foster technology development and innovation. In other words, the Innovative Ecosystem shall, in the scope of the DTP programme, enable collaborative innovation between project partners, their stakeholders and target groups, through combining complementary resources, systems and support, with a clear goal to generate new products, features, processes, services or value. The collaborative aspect is utmost important since it creates value that cannot be produced by the organisation on its own.

4.1 Projects in the Pole

There are 9 projects of the 1st Call and 2 projects of the 2nd Call in the TP 1: Innovative ecosystem for SMEs. Their names, acronyms, lead partners and their contact details are provided in the table below, with a list of thematic fields each project is covering.

Table 2: First Call Projects in the Thematic Pole 1

Project acronym and name	Lead partner contacts	General objective
<p>DanuBioValNet</p> <p>Cross-clustering partnership for boosting eco-innovation by developing a joint bio-based value-added network for the Danube Region</p>	<p>BIOPRO Baden-Württemberg GmbH (DE)</p> <p>Prof. Dr. Ralf Kindervater, email: kindervater@bio-pro.de</p> <p><u>Contact:</u> Dr. Dominik Patzelt, email: patzelt@bio-pro.de</p>	<p>The main objective is to facilitate eco-innovations in the bio-based industry by improving framework conditions and making better use of clusters, potential and diversity of the Danube region. The project focuses on three levels: policy, clusters, and enterprises. A strategy for a Joint Bio-Based Cluster Policy for the Danube Region (JBCCS), includes Action Plan (AP) and provides practical solutions towards harmonisation of bio-based cluster policies. New cluster services will improve the impact of clusters as an enabler for innovation and transnational cooperation. Mapping activities will identify promising value chains and innovation gaps where Pilot Actions (PA) can focus. Open Space Innovation Arenas will bring actors together in a targeted way to create eco-innovation. PA applies roadmaps, tools, and test new bio-based value chain schemes and demonstrates new concepts for transnational and cross-sectoral cooperation for boosting eco-innovation along value chains.</p>

<p>MOVECO</p> <p>Mobilising Institutional Learning for Better Exploitation of Research and Innovation for the Circular Economy</p>	<p>Chamber of Commerce and Industry of Slovenia (SI)</p> <p>Sonja Šmuc, email: kabinet@gzs.si</p> <p><u>Contact:</u> Grit Ackermann, email: grit.ackermann@gzs.si Antonija Bozic Cerar, antonija.cerar@gzs.si</p>	<p>MOVECOs overall objective is improve the infrastructural and institutional framework conditions and policy instruments for eco innovation and the transition to a Circular Economy in the Danube region (DR) by setting up an extensive policy learning exercise, a process of analysis, dialogue, mutual learning among key stakeholders (research, business, policy and civil society). The European Commission (EC) presented a new, ambitious Circular Economy Strategy in Dec. 2015 including new directives to be implemented in member states to transform Europe into a more competitive resource-efficient economy.</p> <p>The project will focus on waste recovery and its link to eco-design and eco innovation, as key pillar of the Circular Economy. Turning waste into a resource for the local economy in the Danube Region requires not only new technologies but overall new concepts and business models. It brings a huge potential for innovation and economic growth. MOVECO will deliver the analysis, the strategy, the roadmaps, as well as the related services and tools for this transition.</p> <p>MOVECO aims at:</p> <ul style="list-style-type: none"> - developing links & synergies and increasing the capacities of business support organisations, research & development and policy-making through structured knowhow transfer, - better research-business collaboration <p>MOVECO will foster smart and sustainable growth and reducing disparities among the regions in the DR, and developing the sustainable innovation potential of the region.</p>
---	--	---

<p>FORESDA</p> <p>Forest-based cross-sectoral value chains fostering innovation and competitiveness in the Danube region</p>	<p>CyberForum e.V. (DE)</p> <p>David Hermanns, email: hermanns@cyberforum.de</p> <p><u>Contact:</u> Kerstin Goos, email: goos@cyberforum.de</p>	<p>General objective: Support the transformation, strengthen the competitiveness of traditional forest-based industries: General objective: Support the transformation, strengthen the competitiveness of traditional forest-based industries:</p> <ul style="list-style-type: none"> - transform traditional forest-based areas into innovative, modern areas - develop innovation-friendly ecosystems aiming to improve or reconfigure the existing value chains - improve innovation culture in SME's - strengthen collaboration in the quadruple helix - implement new ways of collaboration <p>support knowledge transfer, collaboration and innovation</p>
<p>EcoInnDanube</p> <p>Eco-innovatively connected Danube Region</p>	<p>Slovak Centre of Scientific and Technical Information (SK)</p> <p>Ján Turňa, email: jan.turna@cvtisr.sk</p> <p><u>Contact:</u> Anna Janušová, email: anna.janusova@cvtisr.sk Nina Bratkova, nina.bratkova@cvtisr.sk</p>	<p>General objective of the EcoInn Danube project is to enhance cooperation of innovation actors in the field of ecoinnovations with special emphasis on development and application of eco-technologies in the Danube Region. The project will focus mainly on field of renewable energy and energy saving (efficiency).</p>

<p>ACCELERATOR</p> <p>Developing accelerators to provide better access to innovation finance for SMEs</p>	<p>Széchenyi Tőkealap-kezelő Zrt. (HU) (Széchenyi Venture Capital Management)</p> <p>Imre Csuha V. dr., email: info@szta.hu</p> <p><u>Contact:</u> Zoltán Bendó bendo.zoltan@liontaria.hu Éva Gombocz, gombocz.eva@szta.hu</p>	<p>ACCELERATOR engages in exploring and piloting the innovative path of acceleration programmes (a new type of investment readiness programme) towards improved business support in the Danube region.</p>
<p>CrowdStream</p> <p>CROWDfunding to mainSTREAM innovation</p>	<p>Agency for European Integration and Economic Development (AT)</p> <p>Heidrun Zanetta, email: Heidrun.zanetta@aei.at</p> <p><u>Contact:</u> Andrea Gesierich, MA, email: andrea.gesierich@aei.at Maq. Julia Schmid, email: julia.schmid@aei.at</p>	<p>CROWD funding to mainSTREAM innovation (PA1. Innovative and socially responsible Danube region).</p> <p>CrowdStream`s main objective is to improve the effectiveness of public/private business-support for innovative spin-offs & social enterprises to access qualitative alternative financing (crowdfunding). The CrowdStream project will initiate a change in the financing market. Due to quality labelling and capacity building activities there will be a major shift from donation based to equity based crowdfunding. The main project result will be:</p> <p>Improved cooperation between business-support-organisations and enterprises to guarantee a qualitative access to crowd-funding.</p>

<p style="text-align: center;">InnoHPC</p> <p>High-performance Computing for Effective Innovation in the Danube Region</p>	<p>Faculty of Information studies in Novo mesto (SI)</p> <p>Dejan Jelovac, email: dejan.jelovac@fis.unm.si</p> <p><u>Contact:</u> Borut Rončević, email: borut.roncevic@fis.unm.si Tamara Valič, email: tamara.valic@fis.unm.si</p>	<p>InnoHPC will improve framework conditions for innovations in the Danube region by connecting HPC providers, business and innovation support organizations, higher education and research institutions and policy-makers in a transnational InnoHPC laboratory. HPC can process massive data with unprecedented efficiency, thus drastically increasing innovative capacity of SMEs by shortening product development cycle and simulating complex industrial value chains. InnoHPC will develop organizational, technological and educational protocols and materials to pool existing HPC infrastructure in the Danube region to achieve its better utilization without the need for further expensive investments. This will enable structured access to integrated HPC services for enterprises (especially SMEs) developing innovative products to enhance their innovative performance across the Danube region and also beyond. For that purpose, InnoHPC will develop online one-stop-shop, a web platform and capacity building tools for providers and users of HPC. The project will focus particularly on SMEs from automotive and electronic industries with potential to operate as Tier I and Tier II suppliers to multinational companies.</p>
---	--	--

<p>SMART FACTORY HUB</p> <p>Improving RD and business policy conditions for transnational cooperation in the manufacturing industry</p>	<p>Pomurje Technology Park (SI)</p> <p>Marko Močnik, email: marko@p-tech.si</p> <p><u>Contact:</u> Daniel Copot, email: daniel.copot@p-tech.si Tomaz Zadavec, email: tomaz.zadavec@p-tech.si</p>	<p>The main objective is to improve framework conditions for innovation in the area of smart factory, based on RIS3 Centered Model.</p> <p>The SFH addresses these discrepancies and needs by improving competences and skills among the participating organizations, developing tools and methods for transfer of knowledge and good practices and executing concrete pilot actions at the technology transfer level and the policy level.</p>
<p>Made in Danube</p> <p>Transnational Cooperation to transform knowledge into marketable products and services for the Danubian sustainable society of tomorrow</p>	<p>Steinbeis Innovation gGmbH, Steinbeis-Europe-Centre (DE)</p> <p>Erik Burchardt, email: erik.burchardt@stw.de</p> <p><u>Contact:</u> Daniela Chiran, email: chiran@steinbeis-europa.de Miljana Cosic, email: cosic@steinbeis-europa.de Isabel Trömel, email: troemel@steinbeis-europa.de</p>	<p>Made in Danube will support and enable the scientific and technological knowledge available at local level to be offered at transnational level through the tools developed and the partners present in the project.</p> <p>By the development of the common strategy to transform the knowledge into the marketable product, development of tools and instruments (such as innovation audits and brokerage events), the project will initiate 15 joint innovation projects involving 40 companies which will be supported in the cooperation process with RTO through these open innovation tools.</p> <p>The innovative approach of the project aims to combine policy support with practical implementation of pilot activities in 3 existing regional initiatives in 3 relevant Bio-economy domains - sustainable agriculture, sustainable forestry and bio-fuels in the Danube macro-region.</p>

Table 3: Second Call Projects in the Thematic Pole 1

<p>KnowING IPR</p> <p>Fostering Innovation in the Danube Region through Knowledge Engineering and IPR Management</p>	<p>Faculty of Information studies in Novo mesto (SI)</p> <p>Dejan Jelovac, email: dejan.jelovac@fis.unm.si</p> <p><u>Contact:</u> Borut Rončević, email: borut.roncevic@fis.unm.si Tamara Valič, email: tamara.valic@fis.unm.si</p>	<p>KnowING IPR will improve framework conditions for innovation in the Danube region by developing a transnational KnowING IPR platform.</p> <p>The main objective of InnoHPC is to create transnational HPC laboratory for co-designing knowledge-intensive innovative products with high value-added in transnational value-chains. The InnoHPC Lab will pool regional HPC infrastructure and competencies, web platform providing HPC access, integrated services and capacity building tools, and a sustainability toolkit, to support durability of InnoHPC Lab beyond the project.</p>
<p>Danube S3 Cluster</p> <p>Transnational Cluster Cooperation active on Agro – food, based on Smart Specialization Approach in Danube region</p>	<p>South Muntenia Regional Development Agency (RO)</p> <p>Liviu Muşat, email: director@adrmuntenia.ro</p> <p><u>Contact:</u> Gilda Niculescu, e-mail: programe@adrmuntenia.ro</p>	<p>The project aims to leverage the innovation-driven entrepreneurial ecosystem in the Danube area by developing smart and coordinated cluster policies (in RIS3), enhance innovation management knowledge and skills and foster transnational cluster cooperation in the Agro-Food sector.</p> <p>Furthermore the project aims to generate a significant change by developing Danube S3 Cluster Strategy and Programmes based on Quadruple Helix involvement as transnational strategic documents focused on exploiting the linkages between mutually reinforcing specialization areas across sectors.</p>

1st Call projects

2nd Call projects

4.2 Thematic fields

In a first step, common thematic fields as areas to capitalise cooperation were identified by the projects and are depicted in the table below (version: F-1.0):

Table 4: Thematic fields

Project name related to field	Fields and tips of activities
Made in Danube, DanuBioValNet, Danube S3 Cluster	Agriculture (e.g. smart innovative agriculture)
DanuBioValNet, Ecolnn Danube	Bio-energy, Battery, Bio-based Industry/products/value chains (e.g. bio-based packing, eco-construction, bio-plastics)
Smart Factory Hub, FORSEDA, InnoHPC, EcolnnDanube	IT (e.g. smart cities, Energy efficiency, high performance computing, smart manufacturing, manufacturing methods, smart supply network, cybersecurity)
DanuBioValNet, EcolnnDanube, Danube S3 Cluster	Health (e.g. water purification technology, phyto-pharmaceutical Industry, healthy food)
Smart Factory Hub, MOVECO, InnoHPC	Electronic, electrical tools (e.g. intelligent sensors/products)
Made in Danube, Ecolnn Danube	Bio-fuel (e.g. smart heating and cooling, bio-economy)
Made in Danube, DanuBioValNet, FORSEDA	Forestry (transformation traditional forestry into bioeconomy, e.g. manufacturing, wood based materials)
Ecolnn Danube, MOVECO	Eco-Technology (e.g. renewable energy, photovoltaic power plant, energy saving, bio-refinery, manufacturing products)
CrowdStream, Accelerator	Crowdfund (public/private business support and alternative financing, cross border crowdfunding, start-up financing)
Made in Danube, DanuBioValNet	Farming (e.g. smart innovative farming)
DanuBioValNet, Smart Factory Hub, MOVECO, InnoHPC, EcolnnDanube, CrowdStream	Automotive (e.g. E-mobility, VR, digital transformation)
Smart Factory Hub, Accelerator	Accelerators, Access to finance for SMEs and start-ups
MOVECO, EcolnnDanube	Waste Management (recycling, reuse, regenerative resources “circular economy”), material streams
KnowING IPR	Intellectual property rights (IPR) (IPR analysis, IPR management, commercialisation of research, technology transfer), knowledge engineering, automotive sector, HEI and RI sector

In a second step, the fields of activities and related TP1 projects were revised as the progress and measurable achievements of the projects of the Interreg DTP Pole 1 renders this necessary to facilitate an effective and targeted capitalisation.

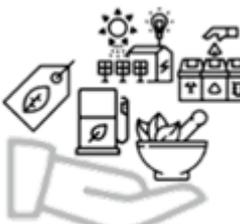

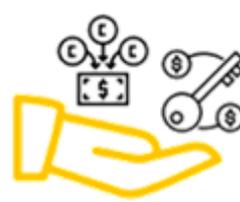

Table 5: Revised thematic fields

Project name related to field	Fields of interest
Made in Danube, Danu-BioValNet, Danube S3 Cluster, FOR-SEDA	Agriculture (e.g. smart innovative agriculture) Forestry (transformation traditional forestry into bioeconomy, e.g. wooden projects, manufacturing, wood based materials) Farming (e.g. smart innovative farming)
DanuBioValNet, Ecolnn Danube, MOVECO, Made in Danube, Danube S3 Cluster	Bio-energy, Bio-based Industry/products/value chains (e.g. bio-based packing, eco-construction, bio-plastics) Bio-fuel (e.g. smart heating and cooling, bioeconomy) Eco-Technology (e.g. renewable energy, photovoltaic power plant, energy saving, bio-refinery, manufacturing products) Waste Management (e.g. recycling, reuse, regenerative resources “circular economy”, sewage & water management), material streams Health (e.g. water purification technology, phyto-pharmaceutical Industry)
Smart Factory Hub, FOR-SEDA, InnoHPC, EcolnnDanube, DanubeBioValNet, MOVECO, CrowdStream	IT (e.g. smart cities, Energy efficiency, high performance computing, smart manufacturing, manufacturing methods, smart supply network, cybersecurity) Electronic, electrical tools (e.g. intelligent sensors/products) Automotive (e.g. E-mobility, VR, digital transformation)
CrowdStream, Accelerator, Smart Factory Hub	Crowdfunding (public/private business support and alternative financing, cross border crowdfunding, startup financing) Accelerators, Access to finance for SMEs and startups
KnowING IPR	Intellectual property rights (IPR) (IPR analysis, IPR management, commercialisation of research, technology transfer), knowledge engineering, automotive sector, HEI and RI sector

4.3 Thematic Task Forces

There is already excellence progress and measurable achievements of the projects of the Interreg DTP Pole 1, nevertheless the potential for effective capitalisation and applicable results remains to be not fully exploited. In addition to that, the topics and issues (thematic fields) addressed by Pole 1 are manifold regarding the domains relevant for an innovative SME sector. Therefore, a new operational concept of the Interreg DTP Pole 1 in the form of a new horizontal structure “Pole 1 Task Forces” was developed to facilitate an even stronger capitalisation of the programme and the project results as a consecutive third step of internal capitalisation.

Table 6: Pole 1 Task Forces

Thematic field of Pole 1 Task Force	New name of Pole 1 Task Force	Task Force Leader	Logo
<ul style="list-style-type: none"> ❖ Agriculture ❖ Forestry ❖ Farming 	Innovative Rural Eco-systems - InnoRurEco	Dominik Patzelt	
<ul style="list-style-type: none"> ❖ Bio-energy ❖ Bio-fuel ❖ Eco-Technology ❖ Waste Management ❖ Health 	Energy 4 the Future	Miljana Ćosić	
<ul style="list-style-type: none"> ❖ IT ❖ Electronic ❖ Electrical tools ❖ Intellectual property rights (IPR) 	itGreen	Borut Rončević	
<ul style="list-style-type: none"> ❖ Crowdfunding ❖ Accelerators ❖ Access to finance for SMEs and start-ups 	Access to Finance	Zoltán Bendó	

The Interreg DTP Thematic Pole 1 has already shown good examples of fruitful capitalisation to the achievement of DTP Pole 1 projects' objectives, among different EUSDR Priority Areas, with a special focus on PA8 and cross-area contribution of PA 7, as well as cross-pole support of the Interreg DTP Capitalisation Strategy through adopted projects of not only TP 1 but also TP 2 and TP 3. The establishment of field related TP 1 Task Forces focuses on the thematic capitalisation within Pole 1 "innovative ecosystem for SMEs", to identify concrete opportunities and precise options for actions which could serve as a basis for the further capitalisation activities not only within Thematic Pole 1 but also with other DTP Thematic Poles or EU funding programmes such as Interreg (Alpine space, Central Europe, Europe etc.) or Horizon 2020 (see 4.4.).

At the same time the Thematic Pole 1 Task Forces can highlight potential synergies by addressing the cooperation opportunities to foster the improvement and sharpening of the Interreg DTP programme goals and thus representing an important impetus for future programme calls.

Further information on the establishment of the DTP Thematic Pole 1 Task Forces, their results and conclusions for further steps are elaborated in the Report of the Pole 1 "Innovative ecosystem for SMEs" Capitalisation Workshop together with Priority Area 8 "Competitiveness" which is published on the DTP Pole 1 website (<http://www.interreg-danube.eu/relevant-documents/dtp-capitalisation-strategy/thematic-pole-1-innovative-ecosystem-for-smes>).

4.4 Synergies with other projects

In the following table, potential synergies with projects from other programmes, initiatives, institutions are identified. Those projects, institutions, partners etc. can be invited to join the TP1 work in several fields, such as joining project activities, events, disseminating actions and pilot actions to foster cross-sectoral capitalisation covering several EU-funding programmes.

Table 7: Synergies with other projects

TP Project acronym	Project acronym	Programme	Area of cooperation
DanuBioValNet	I-CON GREENOMED INNOLABS	Interreg Central Europe MEDITERRANEAN H2020 INNOSUP	Food sector innovations – pilot actions Food sector innovations – pilot actions Collaborative potential of SMEs by combining ICT with the BIO, Health, and Medicine sectors

1st Call projects

2nd Call projects

The list of projects with which synergies could be developed is to be updated regularly.

4.5 TP Objectives

Objectives of the activities in the TP1 are:

- To valorise and further build upon the knowledge resulting from projects working in a thematic field
- To fill knowledge-gaps by linking actors with complementary thematic specialization, experiences, methodological approaches or geographical scope
- To increase the visibility of the projects and the Programme and to ensure their impact on the policy making process at local, regional, national and European levels
- To strengthen strategic thematic networks in the Programme area
- To encourage the wider take-up of project outcomes from outside the DTP Programme area
- To contribute to the design and/or implementation of future transnational cooperation in the area

4.6 Target groups

- DTP projects working on similar or complementary topics
- Beneficiaries of DTP project outputs
- DTP stakeholders
- DTP Programme bodies
- Other DTP Poles in relevant fields of cooperation
- Projects and stakeholders outside the Programme area, relevant to the Thematic Pole
- Priority Area Coordinators (PAC) of the EU Strategy for the Danube Region (particularly PAC 8, PAC 7 and PAC 9)

5 Thematic Pole activities

WP1: Communication activities

A1.1 Internal communication

Information flow plays important role in executing the TP activities. Well recognised and widely used tools for co-ordination and communication within the TP will be used.

- An email is the most important means of communication, used for daily communication between partners and follow up on all important aspects of the TP activities (see the list of TP members with e-mail addresses – Table 2);
- A telephone will be used for daily person-to-person communication;
- A subscription-free (or payable) conference software which allows voice conference and sharing desktop utility will be used for remote conferences when more partners are involved in particular communication.
- Pole meetings might be organized in parallel to common events or DTP events, for collaborative work

A1.2 External communication and promotion

These activities should have a strong impact on the majority of pole process objectives – visibility, better impact on the policies, strengthening of the thematic networks, and wider take-up of the project outcomes. For synergy between internal and external communication, a LinkedIn group has been created - **Innovative Ecosystems**, as well as **Twitter account - @InnoEcosystems (name: Innovative Ecosystems), Danube#2019**. All members of project consortiums and projects stakeholders are encouraged to join the group, and group moderator should approve their request. The lead partner of FORESDA project is responsible for LinkedIn group administration.

All stakeholders (project partners) are encouraged to promote pole process by their own social networks profiles and by social networks profiles of their organizations, by existing project web sites and mailing lists.

Deliverables:

- D1a: Mailing list (Table 2)
- D1b: Promotional material (about thematic pole and about other projects included in the pole): press releases and information sharing on current project public relation tools (web sites, newsletters, social network accounts ...)
- D1c: LinkedIn group (Innovative Ecosystems) and Twitter account @InnoEcosystems

WP2 Capitalisation strategy and plan creating

A2.1 Workshop at the DTP LP seminar

First meeting of the lead project partners representatives has been organised at the 2017 DTP LP conference on 25th of January in Budapest, Hungary. This event has been focused on estab-

lishing the Thematic Pole and identification of potential synergies. The Thematic Pole has produced Meeting minutes, which outlined the initial Capitalisation roadmap framework.

A2.2. Thematic Pole roadmap production

On the basis of inputs from the first Thematic Pole workshop in Budapest and additional communication between pole partners, Capitalisation roadmap (this document) has been created in the form of a list of joint activities and a time-plan for executing them. In order to make this process as efficient as possible, the Roadmap is entail additional important information for the process. It will be the basic strategic document for the whole process. The pole leader is responsible for document creation and its implementation.

Deliverables:

- D2: Thematic Pole Roadmap

WP3 Joint activities and events

A3.1 Joint activities

Based on discussion between TP partners, there could be several joint activities and thematic events organised by TP partners. As joint activities and events, the following examples are suggested:

- Joint thematic studies or sharing studies between projects;
- Peer review or benchmarking of project outputs;
- Exchange visits between projects, if this enables cross-fertilisation and/or take-up of results;
- Joint dissemination activities such as joint conferences addressing common stakeholders and target groups.

The Table below shows the initial planning of joint activities in the first year of TP projects execution, which will be updated regularly.

Table 8: Joint activities plan

1st Call projects

2nd Call projects

A3.2 Development of new projects

There is a great opportunity to develop new ideas and initiatives into projects during the process of communication, networking, know-how sharing and other forms of participation in the thematic pole. Partners are encouraged to develop new partnership transnational projects as an assurance of their sustainability and sustainability of the Pole efforts.

The following table can be used for list of new initiatives:

Table 16: List of new project ideas

Project name	Owner	Short description (1-3 sentences)	Profile of the required partners

Deliverables:

- D3a: Pole joint activities and events
- D3b: New project ideas

A3.3 Proposal: Common TP website within the DTP website

Moreover, the TP1 proposes to the DTP, that the programme prepares a separate section on the Interreg-Danube website for all of the thematic poles. On these websites, all of the project outputs/news that the affiliated projects produce would automatically be taken from the projects, linked to the specific thematic pole, posted and listed. Thus, Individual project outputs / results for a specific thematic pole can be identified at once. Furthermore, we propose, that common results / outputs (if applicable) can be listed on this website. This would give the opportunity to give reference on all individual project disseminating tools (newsletter, handouts, talks, workshops,..) to the common thematic pole.

6 Pole Organization Structure

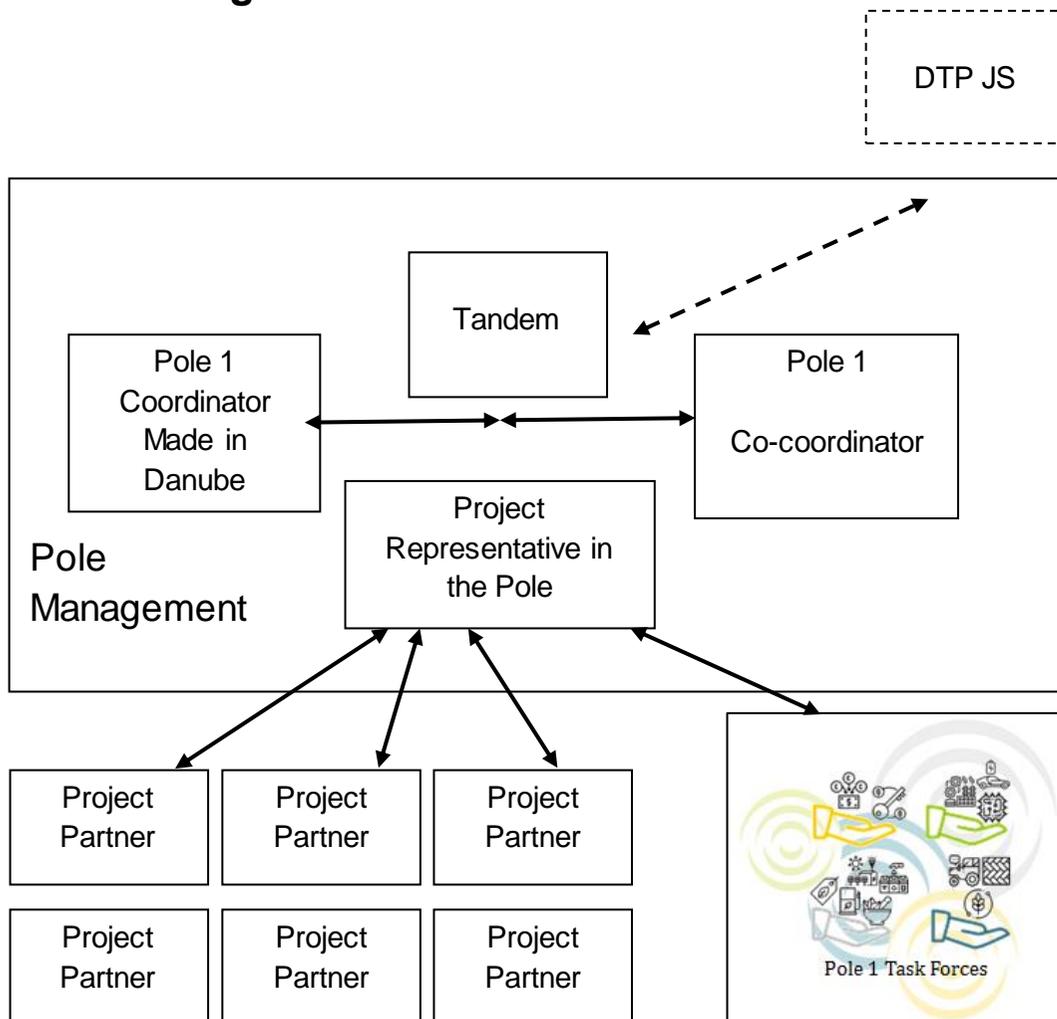

Figure 1: Organization structure

The structure of the Thematic Pole organizational structure is made of:

- **Pole management**, responsible for the Pole coordination in general;
- **Pole Coordinator**, responsible for the coordination of the activities in the thematic pole, for communication and reporting to DTP JS and for communication with project representatives;
- **Pole co-coordinator** will support the coordinator during one reporting period (6 M tandem)
- **Project representatives in the pole**, official representatives of the projects (LP representatives) which are a part of the thematic pole. They are responsible for communication with pole coordinator and for coordinating pole activities in their project consortium;
- **Project partners**, communicate with their project representative about strategies, ideas, activities and shall be included in pole activities.

7 Projects and partners in the pole

To make individual project outputs/ results known to a broader group of stakeholders and target groups and thus encourage the wider take-up of projects' outcomes, it is proposed that each partner collaborates with other partners from similar projects within the TP. In many cases, partners coming from the same country are addressing the same group of stakeholders, therefore collaboration on national level is welcome. The table below provides an overview of partners' locations.

Table 18: Members of the pole by country and projects
